Progress in Neurology and Psychiatry: An Annual Review; Volume XXIII, 1968 *Current List of Medical Literature*, 1957 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library Research Grants Index National Institutes of Health (U.S.). Division of Research Grants, 1967 **The Electrical Review**, 1976 **The Encyclopaedic Dictionary** Robert Hunter, 1903 **Philosophical Issues in Psychiatry IV** Kenneth S. Kendler, Josef Parnas, 2017-03-24

The revisions of both DSM IV and ICD 10 have again focused the interest of the field of psychiatry and clinical psychology on the issue of nosology This interest has been further heightened by a series of controversies associated with the development of DSM 5 including the fate of proposed revisions of the personality disorders bereavement and the autism spectrum Major debate arose within the DSM process about the criteria for changing criteria leading to the creation of first the Scientific Review Committee and then a series of other oversight committees which weighed in on the final debates on the most controversial proposed additions to DSM 5 providing important influences on the final decisions Contained within these debates were a range of conceptual and philosophical issues Some of these such as the definition of mental disorder or the problems of psychiatric epidemics have been with the field for a long time Others the concept of epistemic iteration as a framework for the introduction of nosologic change are quite new This book reviews issues within psychiatric nosology from clinical historical and particularly philosophical perspectives The book brings together a range of distinguished authors including major psychiatric researchers clinicians historians and especially nosologists including several leaders of the DSM 5 effort and the DSM Steering Committee It also includes contributions from psychologists with a special interest in psychiatric nosology and philosophers with a wide range of orientations The book is organized into four major sections The

first explores the nature of psychiatric illness and the way in which it is defined including clinical and psychometric perspectives The second section examines problems in the reification of psychiatric diagnostic criteria the problem of psychiatric epidemics and the nature and definition of individual symptoms The third section explores the concept of epistemic iteration as a possible governing conceptual framework for the revision efforts for official psychiatric nosologies such as DSM and ICD and the problems of validation of psychiatric diagnoses The book ends by exploring how we might move from the descriptive to the etiologic in psychiatric diagnoses the nature of progress in psychiatric research and the possible benefits of moving to a living document or continuous improvement model for psychiatric nosologic systems The result is a book that captures the dynamic cross disciplinary interactions that characterize the best work in the philosophy of psychiatry
