Introduction to Computational Macroeconomics Anelí Bongers, Trinidad Gómez, José L. Torres, 2020-09-01 This book presents an introduction to computational macroeconomics using a new approach to the study of dynamic macroeconomic models. It solves a variety of models in discrete time numerically using a Microsoft Excel spreadsheet as a computer tool. The solved models include dynamic macroeconomic models with rational expectations both non microfounded and microfounded constituting a novel approach that facilitates the learning and use of dynamic general equilibrium models which have now become the principal tool for macroeconomic analysis. Spreadsheets are widely known and relatively easy to use meaning that the computer skills needed to work with dynamic general equilibrium models are affordable for undergraduate students in Advanced Macroeconomics courses.

Comparative handbook: robotic technologies law Alain Bensoussan, Jérémy Bensoussan, 2016-06-28 Studies of the overall impact of robotics on the economy have shown that investments in its various sectors industrial professional and service robotics are increasing globally and the markets associated with them are valued in billions. Robotization improves the competitiveness of enterprises while collaborative robotics reinvents methods of production. Beyond the economic outlook service robotics backed by the development of artificial intelligence raises challenging ethical and social issues. The legal analysis of robotics is no mean feat because it covers a very diverse technical reality. Companies whose businesses are focused on robotic technologies and applications can be confronted with a complex legal situation resulting from the plurality of the applicable rules which have not necessarily

been conceived or adopted bearing in mind their specific constraints This situation should not hamper their development It only implies taking cues from the economic legal norms which promote such developments and conducting an analysis of the legal risks which they face given the applicable rules of liability This comparative study carried out by members of the Lexing Network proposes an overview having regard to the legislation of 17 different countries of the legal issues raised by robotics and the way the law in force responds in a more or less satisfactory manner Discover the authors contributors in details under the tab Extraits
