Driving Customer Equity Valarie A. Zeithaml, Katherine N. Lemon, Roland T. Rust, 2001-02-21 In their efforts to become more customer focused, companies everywhere find themselves entangled in outmoded systems, metrics, and strategies rooted in their product-centered view of the world. Now, to ease this shift to a customer focus, marketing strategy experts Roland T. Rust, Valarie A. Zeithaml, and Katherine N. Lemon have created a dynamic new model they call Customer Equity, a strategic framework designed to maximize every firm's most important asset: the total lifetime value of its customer base. The authors' Customer Equity Framework yields powerful insights that will help any business increase the value of its customer base. Rust, Zeithaml, and Lemon introduce the three drivers of customer equity: Value Equity, Brand Equity, and Retention Equity, and explain in clear, nontechnical language how managers can base their strategies on one or a combination of these drivers. The authors demonstrate in this breakthrough book how managers can build and employ competitive metrics that reveal their company's Customer Equity relative to their competitors. Based on these metrics, they show how managers can determine which drivers are most important in their industry, how they can make efficient strategic trade-offs between expenditures on these drivers, and how to project a financial return from these expenditures. The final section devotes two chapters to the Customer Pyramid, an approach that segments customers based on their long-term profitability, and an especially important chapter examines the Internet as the ultimate Customer Equity tool. Here, the authors show how companies such as Intuit.com, Schwab.com, and Priceline.com have used more than one or all three drivers to increase Customer Equity. In this age of one-to-one marketing, understanding how to drive Customer Equity is central to the success of any firm. In particular, *Driving Customer Equity* will be essential reading for any marketing manager, and for that matter, any manager concerned with growing the value of the firm's customer base.

The Interaction Field Erich Joachimsthaler, 2020-09-15 Learn how the most successful businesses are creating value and igniting smart growth in a fast-paced competitive market. Most businesses today focus on competition and disruption instead of collaboration, participation, and engagement. They focus on transactions instead of interactions. They seek to optimize or extract value rather than share it. They build assets and thrive on enormous scale, huge distribution networks, and brand recognition. But then along comes a rival that doesn't care much about your brand and your other assets, and it either rushes past you or mows you down. In *The Interaction Field*, management expert and professor Erich Joachimsthaler explains that the only way to thrive in this environment is through the Interaction Field model.

Companies who embrace this model generate facilitate and benefit from data exchanges among multiple people and groups from customers and stakeholders but also from those you wouldn't expect to be in the mix like suppliers software developers regulators and even competitors And everyone in the field works together to solve big industry wide or complex and unpredictable societal problems The future is going to be about creating value for everyone Businesses that solve immediate challenges of people today and also the major social and economic challenges of the future are the ones that will survive and grow

Alternative Ideas from 10 (Almost) Forgotten Economists Irene van Staveren, 2021-01-18 How should we address today s big problems and what we can take from icons of economics past How would John Maynard Keynes have resolved today s debt problem or how would Adam Smith have assessed the European carbon emission trading market This book applies the ideas of ten renowned economists Marx Minsky Keynes Knight Bergmann Veblen Sen Myrdal Smith Robinson to real world economic problems directly or indirectly related to the causes and consequences of the 2008 financial crisis Each chapter presents an economist and structures the problem the insight the economist s idea the economist short bio and two practices offering real world alternatives This book presents a lively and original approach that will be of interest to economists and non economists alike discussing key elements of an economics for a postcapitalist economy and connecting policy insights to real world problems of today New Business for Old Europe Arnold Tukker, Ursula Tischner, 2017-09-29 Selling products used to be the standard way of doing business Traditionally it is left to the user to transform the purchase of a product into something that fulfils effectively a final user need Today two streams of research business management and sustainability normally with very distinct perspectives on the world have surprisingly converged to form a common conclusion selling products is old fashioned business Companies should switch their focus to selling need fulfilment satisfaction or experiences Or in other words selling integrated solutions or product services The business management literature argues that by focusing on the integrated final client needs and delivering integrated solutions fulfilling these needs companies will be able to improve their position in the value chain enhance added value of their offering and improve their innovation potential In a

business world where many products are becoming equally well performing commodities this strategy is one of the ways to avoid a sheer competition on price a type of competition that Europe never can win with emerging and low cost economies such as China In that sense product services can mean new business for old Europe The sustainability knowledge stream argues that need focused solutions could be inherently more sustainable than products Product services could offer the value of use instead of the product itself and decrease the environmental load in two ways First companies offering the service would have all the incentives to make the product system efficient as they get paid by the result Second consumers would be encouraged to alter their behaviour as they gain insight into all the costs involved with the use Until today the connections and interchange between the two research streams have been quite limited The question of whether product services truly are the avenue to a sustainable world is still under discussion This book aims to develop a systematic view on this issue The potential of product services to enhance competitiveness and contribute to sustainable development prompted the EU to invest heavily in the theme under the EU s 5th Framework Programme FP5 1997 2002 A variety of research and development projects in the field were supported under the umbrella of the Sustainable Product Development Network SusProNet These included MEPSS Methodology Product Service Systems Home Services HiCS Highly Customised Solutions Prosecco Product Service Co design and Innopse Innovation Studio and exemplary developments for Product Service The projects were undertaken by a mix of European research institutions and companies including Orange Philips and Nokia Some of these projects focused on developing methods that could help industries change their output from a product to a service Others focused on the development of new product services or solutions HiCS Prosecco Innopse and yet others tried to analyze under which circumstances product services are likely to be implemented and accepted by consumers Home Services One project focused on dissemination of the concept to SMEs Lean Services Other projects focused purely on new product service development such as Brainfridge an intelligent fridge managing its supply chain ASP NET application service providers Protex intelligent enzymes and IPSCON receivers for wireless telephones New Business for Old Europe brings together the key outputs from all of these groups to present a state of the art collection on product service development prospects and implications for competitiveness and sustainability The book has a number of aims First it attempts to bridge the gap between business and sustainability literature to lead to a better founded understanding of the business drivers for embarking on product service development and its relation with sustainability and competitiveness Second the book reviews the large amount of studies that have developed toolkits methods and approaches that can support marketers product developers and strategists in business to develop product services selects the best practice approaches and analyses any gaps Third the book examines what opportunities there are for product service development in a variety of key areas including base materials information and communication technologies offices food and households Each chapter in this section discusses the area developments that will stimulate or hinder the market opportunities for product services product

service examples and typical implementation challenges for product services in that area. These chapters serve as a quick introduction for companies interested in developing product services in a specific area. Fourth, the book translates all the lessons into suggested approaches for product service development by companies. Annexes include a lightweight product service development manual and an alphabetical list of useful underlying tools.

Advances in Manufacturing IV Adam Hamrol, Marta Grabowska, Marcin Hinz, 2024-03-27. This book covers timely topics in quality engineering with a special focus on issues relating to Industry 4.0 and 5.0. Based on peer-reviewed contributions to the 8th International Scientific Technical Conference MANUFACTURING 2024 held on May 14-16, 2024, in Poznań, Poland, the chapters describe advanced engineering methods for managing quality and risk at different stages of the product lifecycle. They discuss the role of the sustainable development aspect in supply chain in the context of product and business planning, production and transportation, and the principles and best practices of circular economy. They also highlight the role of the human factor in Industry 5.0 and discuss educational issues. All in all, this book provides both researchers and practitioners with a timely guide on research in the broad area of quality engineering, covering human and environmental aspects of industrial production and risk-based management methods.

Confessions of the Pricing Man Hermann Simon, 2015-10-20. The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life, we constantly make decisions about whether something is worth our money or our time, or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail with equal parts psychology, economics, strategy, tools, and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way, though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets to a distinguished academic career to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus and helped countless managers and executives use pricing as a way to create new markets, grow their businesses, and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail but still makes it go down smoothly and leaves you wanting to learn more and do more as a consumer or as a

business person You will never look at pricing the same way again *Marketing* Gary Armstrong, Philip Kotler, Michael Harker, Ross Brennan, 2019 La 4 de couv indique Marketing An Introduction introduces students at all levels undergraduate postgraduate and professional courses to marketing concepts It focuses on how to build profitable customer relationships by encouraging students to apply concepts to real commercial practice through numerous case studies from around the world Now updated with the last ideas in digital marketing such as big data analytics and social marketing as well as up to date case studies from a range of consumer and industrial brands including Netflix Aldi Spotify Phillips Renault and Airbus 380 this fourth edition combines the clarity and authority of the Kotler brand within the context of European marketing practice Marketing An Introduction makes learning and teaching marketing more effective easier and more enjoyable The text s approachable style and design are well suited to cater to the enormous variety of students taking introductory marketing classes *Identifying Hidden Needs* K.
