

## SCIENCE/UNIVERSITY/COLLEGE ESSAY

For as long as I can remember, I have dreamed of science. Where others see the engineering, experimentation, and presentation of science as a chore, I only see excitement. Even as a child I constantly sought it out, first on television with {{Name}} and {{Program}}, then later in person in every museum exhibit I could find.

Science in all its forms fascinated me, but science projects were a category all to themselves. To me, science projects were a special joy that only grew with time. In fact, it was this continued fascination for hands-on science that brought me years later to the sauna that is the {{University}} in mid-June. Participating in the Student Science Training Program and working in their lab made me feel like a kid in a candy store. Just the thought of participating in a project at this level of scientific rigor made me forget that this was supposed to be my summer break and I spent the first day eagerly examining every piece of equipment.

Even at first, when the whole research group sat there doing rote calculations and others felt like they were staring down the barrel of defeated purpose, I remained enthusiastic. Time and time again I reminded myself of that famous phrase "*great effort leads to great rewards*" and sure enough, soon my aspirations began to be met. This shift in attitude also coincided with a shift in location: from the computer desk to the laser lab. It was finally time to get my hands dirty.

Now things began to get really interesting. During the experimentation phase of the project, I spent the majority of my waking hours in the lab – and I enjoyed every minute of it. From debriefing with my coordinator in the morning to checking and rechecking results well into the afternoon, I was on cloud nine all day, every day. I even loved the electric feeling of anxiety as I waited for the results. Most of all, though, I loved the pursuit of science itself. Before I knew it, I was well into the seventh week and had completed my first long-term research experiment.

In the end, although the days were long and hard, my work that summer filled me with pride. That pride has confirmed and reinvigorated my love for science. I felt more alive, more engaged, in that lab than I have anywhere else, and I am committed to returning. I have always dreamed of science but since that summer, since my experiment, I have dreamed only of the future. To me, medical science is the future and through it I seek another, permanent, opportunity to follow my passion. After all, to follow your passion is, literally, a dream come true.
