Laboratory Balances - Calibration Requirements ,2020      **A User's Guide to the Calibration of Laboratory Balances**  
Testing Laboratory Registration Council of New Zealand,1981      A User's Guide to the Calibration Requirements of  
Laboratory Balances Malcolm R. Bell,Testing Laboratory Registration Council of New Zealand,1977      The Calibration of

Technical Documentation for the Mass Calibration Laboratory Balance Automation (Classic Reprint) Vincent J.  
Lee,2018-10-21 Excerpt from Technical Documentation for the Mass Calibration Laboratory Balance Automation The balance  
automation software was written to improve and ease the process of mass calibrations Previously mass calibration staff  
would measure a set of weights and record manually on paper the balance readings for each weighing step in the weighing  
process This introduces dust into the measuring environment and inaccuracies in data collection The weighing steps are  
dictated by the measurement design chosen by the staff according to the weight set Proper sequencing of the measurements  
must also be done by hand most likely for long and tedious designs Environmental values of air temperature atmospheric  
pressure and relative humidity are recorded twice once before the weight measurements and once after also manually Note  
as well that although the balances are electronic and capable of serial communications with computer equipment they were  
used manually The automation software s function allows one to four operators each at any of the four stations to perform  
measurements simultaneously The software coordinates the balance and environmental readings by connecting the computer  
to the instruments via the coms boxes for each mass measurement It communicates with the thermometer barometer  
hygrometer and balance through links between the ports of the coms boxes to get their readings records the data values in  
files on the data disk and instructs the operator on when to place weights on the balance pan After the measurement of the  
weights is completed the software filters the data for operator rejected measurements combines the data from previous  
series if they exist and creates an input file that is formatted for the Mass Code software program The Mass Code runs and  
was developed separately from this automation software Note that the input file is created only after a single series design  
measurement or after the last series of a design is complete Also the data file may be read into a Spreadsheet program for  
custom analysis About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at

calibration and record system has been developed using a spread sheet to consolidate information required to calibrate electronic balances and satisfy requirements for traceability validation and documentation Several improvements have been made over an Epson HX 20 trademark notebook computer based balance calibration system which was developed at the Savannah River Site in 1986 and used continuously since to annually calibrate electronic balances These improvements included built in tables of balance models performance test limits and calibration standards apparent masses calculated ratios of balance to test weight uncertainties bar code data input enhanced graphs and tables and permanent electronic records The software and hardware were thoroughly tested by calibrating 30 balances in another department Hardware for importing data from balances through an RS 232 interface and bar code reader into a portable computer s spread sheet was evaluated and found to add little value to the calibration process Computerized data collection minimizes record handling and reduces paper work costs by 50% Databases are established for each organization s electronic balances that contain records for each balance that are identified by model property identification number and location In addition each record contains calibration and expiration dates performance testing information etc Details of equipment statistical testing spread sheet features and examples of the program are described
