Applied Food Protein Chemistry Zeynep Ustunol, 2014-12-31 Food proteins are of great interest not only because of their nutritional importance and their functionality in foods but also for their detrimental effects. Although proteins from milk, meats, including fish and poultry, eggs, cereals, legumes, and oilseeds have been the traditional sources of protein in the human diet, potentially any proteins from a biological source could serve as a food protein. The primary role of protein in the diet is to provide the building materials for the synthesis of muscle and other tissues, and they play a critical role in many biological processes. They are also responsible for food texture, color, and flavor. Today, food proteins are extracted, modified, and incorporated into processed foods to impart specific functional properties. They can also have adverse effects in the diet. Proteins such as walnuts, pecans, almonds, and cashews, soybean, wheat, milk, egg, crustacean, and fish proteins can be powerful allergens for some people. *Applied Food Protein Chemistry* is an applied reference which reviews the properties of food proteins and provides in-depth information on important plant and animal proteins consumed around the world. The book is grouped into three sections: 1. overview of food proteins, 2. plant proteins, and 3. animal proteins. Each chapter discusses world production, distribution, utilization, physicochemical properties, and the functional properties of each protein, as well as its food applications. The authors for each of the chapters are carefully selected experts in the field. This book will be a valuable reference tool for those who work on food proteins. It will also be an important text on applied food protein chemistry for upper-level students and graduate students of food science programs. *Food Science: An Ecological Approach* Sari Edelstein, 2018-01-16 *Food Science: An Ecological Approach* presents the field of food science, the study of the physical, biological, and chemical makeup of food and the concepts underlying food processing in a fresh, approachable manner that places it in the context of the world in which we live today. *The Routledge Handbook of Food Ethics* Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating, in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor, justice, public health, social inequity, animal rights, and environmental ethics. This handbook provides a much-needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social, cultural, and political life. Unlike other books on the topic, this text integrates traditional approaches to the subject with cutting-edge research in order to set a new agenda for philosophical discussions of food ethics. *The Routledge Handbook of Food Ethics* is an outstanding reference source to the key topics, problems, and debates in this exciting subject and is the first collection of its kind. Comprising over 35 chapters by a team of international contributors, the Handbook is divided into 7 parts: the phenomenology of food, gender and food, food and cultural diversity, liberty, choice, and food policy, food and the environment, farming and eating, other animals, food justice. Essential reading for students and researchers in food ethics, it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics. **The Psychic Hold of**

Slavery Soyica Diggs Colbert, Robert J. Patterson, Aida Levy-Hussen, 2016-07-20 What would it mean to get over slavery Is such a thing possible Is it even desirable Should we perceive the psychic hold of slavery as a set of mental manacles that hold us back from imagining a postracist America Or could the psychic hold of slavery be understood as a tool helping us get a grip on the systemic racial inequalities and restricted liberties that persist in the present day Featuring original essays from an array of established and emerging scholars in the interdisciplinary field of African American studies *The Psychic Hold of Slavery* offers a nuanced dialogue upon these questions With a painful awareness that our understanding of the past informs our understanding of the present and vice versa the contributors place slavery's historical legacies in conversation with twenty first century manifestations of antiblack violence dehumanization and social death Through an exploration of film drama fiction performance art graphic novels and philosophical discourse this volume considers how artists grapple with questions of representation as they ask whether slavery can ever be accurately depicted trace the scars that slavery has left on a traumatized body politic or debate how to best convey that black lives matter *The Psychic Hold of Slavery* thus raises provocative questions about how we behold the historically distinct event of African diasporic enslavement and how we might hold off the transhistorical force of antiblack domination

The Future of Foods Maria G. Corradini, Tatiana

Koutchma, Noemi Elisabet Zaritzky, Isabel Sousa, 2025-09-10 The future of food can take many avenues of exploration from the product itself such as unusual sources like grass microalgae acorns and so on to by products from the food industry e.g. fruit pomaces and brewer spent grains to disruptive technologies from data management and integration e.g. digital twins to processing e.g. additive manufacturing precision fermentations cell ag When considering the future of food sometimes this is more accurately seen as the cycle of food Development is continual but sometimes to address the future we must look historically for example a resurgence in pulses for protein or the increase in shelf stable foods due to the Covid 19 pandemic The future of food requires many considerations such as life cycle assessment customization social impact environmental impact and economic impact In particular when developing new foods with sustainability in mind e.g. alternative proteins one has to take into account the health benefits as well as indulgence and sensory appeal and these factors must be weighed against the financial cost of the production processes and the ultimate cost to the consumer *Comprehensive Dissertation Index*, 1984
