localized well tuned into their present business Integrated technology is required to cope with these needs The danger of over engineering has never been as great as today The question is frequently not whether some new features are technically feasible but whether customers are willing to accept and pay for it The first edition of Managing Global Innovation was sold out after few months clearly indicating the search for solutions to these challenges This second edition has been revised for clarity and actuality We have taken care to work in recent research findings as well as updating the case studies where appropriate This book is based on the growing importance of industrial global innovation and the lack of concepts to manage it For this book we conducted 320 interviews in 40 technology based highly internationalized companies including additional interviews in 1998 and 1999 for the second edition Our interview partners were R D managers and research directors from companies in Europe USA and Japan
