A Corporate Solution to Global Poverty George Lodge, Craig Wilson, 2016-06-28 World leaders have given the reduction of global poverty top priority And yet it persists Indeed in many countries whose governments lack either the desire or the ability to act poverty has worsened This book a joint venture of a Harvard professor and an economist with the International Finance Corporation argues that the solution lies in the creation of a new institution the World Development Corporation WDC a partnership of multinational corporations MNCs international development agencies and nongovernmental organizations NGOs In A Corporate Solution to Global Poverty George Lodge and Craig Wilson assert that MNCs have the critical combination of capabilities required to build investment grow economies and create jobs in poor countries and thus to reduce poverty Furthermore they can do so profitably and thus sustainably But they lack legitimacy and risk can be high and so a collective approach is better than one in which an individual company proceeds alone Thus a UN sponsored WDC owned and managed by a dozen or so MNCs with NGO support will make a marked difference At a time when big business has been demonized for destroying the environment enjoying one sided benefits from globalization and deceiving investors the book argues MNCs have much to gain from becoming more effective in reducing global poverty This is not a call for philanthropy Lodge and Wilson believe that corporate support for the World Development Corporation will benefit not only the world's poor but also company shareholders as a result of improved MNC legitimacy and stronger markets and profitability

Global Finance and Development David Hudson, 2014-11-27 The question of money, how to provide it and how to acquire it where needed is axiomatic to development. The realities of global

poverty and the inequalities between the haves and the have nots are clear and well documented and the gaps between world's richest and the world's poorest are ever increasing. But even though funding development is assumed to be key, the relationship between finance and development is contested and complex. This book explores the variety of relationships between finance and development, offering a broad and critical understanding of these connections and perspectives. It breaks finance down into its various aspects with separate chapters on aid, debt, equity, microfinance, and remittances. Throughout the text, finance is presented as a double-edged sword while it is a vital tool towards poverty reduction, helping to fund development, more critical approaches remind us of the ways in which finance can hinder development. It contains a range of case studies throughout to illustrate finance in practice, including UK aid to India, debt in Zambia, Apple's investment in China, microfinance in Mexico, government bond issues in Chile, and financial crisis in East Asia. The text develops and explores a number of themes throughout, such as the relationship between public and private sources of finance and debates about direct funding versus the allocation of credit through commercial financial markets. The book also explores finance and development interactions at various levels, from the global structure of finance through to local and everyday practices. *Global Finance and Development* offers a critical understanding of the nature of finance and development. This book encourages the reader to see financial processes as embedded within the broader structure of social relationships. Finance is defined and demonstrated to be money and credit but also, crucially, the social relationships and institutions that enable the creation and distribution of credit and the consequences thereof. This valuable text is essential reading for all those concerned with poverty, inequality, and development.

International HRM and Development in Emerging Market Multinationals Paresha Sinha, Parth Patel, Verma Prikshat, 2021-12-21. Emerging multinational enterprises or EMNEs have made a huge impact on the international business stage by internationalising at a rapid rate. And they have performed remarkably well in both developing and developed countries. Accordingly, there is a growing strand of literature on how EMNEs manage their international human resource (IHRM) practices in different international contexts. However, the majority of the literature on IHRM practices of EMNEs is limited to explaining what international management practices EMNEs implement in their foreign subsidiaries and how they implement them. Too often, EMNEs struggle to transfer their weak management practices across national borders as they have limited experience, resources, and capabilities when compared to MNEs from developed countries. Developing a better understanding on the manner in which EMNEs adopt their international human resource management and development practices abroad is therefore paramount to fully understand their globalisation-related behaviours. This dedicated book will aim to provide a holistic picture and contemporary insights on IHRM in emerging multinational enterprises. It will be of interest to researchers, academics, and students in the fields of business and management, especially those with a particular interest in human resource management, firm internationalisation, and emerging markets.
