at present there is widespread interest in aging but there is also a lack of knowledge as to what has already been accomplished in the area what the theoretical issues are and what factors contribute to the methodological and practical difficulties The time is propitious for meetings of experts in various aspects of the aging process both to discuss among themselves latest advances in the field and also to integrate known information for researchers and practitioners In the summer of 1980 we organized such a meeting as the 10th annual psychology symposium to be held at the Erindale Campus of the University of Toronto The topic chosen was Aging and Cognitive Processes and the edited contributions to the symposium form the chapters of the present book
