

## MUSCULOSKELETAL SYSTEM

Skeletal + Muscular systems are considered one because they work together to enable us to move

- ✓ Skeletal framework gives us support and it is what the muscles are attached to, joints are the articulations between bones
- ✓ Muscle contraction pulls the bone and changes the angle of the joint
- ✓ Movement relies on the functioning of the nervous, circulatory, and respiratory systems (1) need nerve impulses to contract muscles, (2) blood supply from circulatory system, (3) oxygen from respiratory system
