Geographies Of Alternative Education:

, Alternative Educational Programmes, Schools and Social Justice Glenda McGregor, Martin Mills, Pat Thomson, Jodie Pennacchia, 2019-10-18 Alternative education caters and cares for students whose regular schools have failed and excluded them Fifty years of international research reports that alternative settings are characterised by close and powerful staff student relationships a curriculum which is relevant engaging and meaningful and the strong sense of agency afforded young people by the opportunity to make decisions Together these three practices produce increased life chances for alternative education participants However despite these apparent successes alternative education seems to have had little impact on mainstream schools This collection of papers addresses the important question what might regular schools and teachers learn about socially just pedagogies from alternative education practices In providing answers to this question authors interrogate the taken for granted wisdom about alternative education while also taking account of ongoing policy shifts differing locations and populations and persistent and intersecting patterns of raced classed and gendered inequalities They draw on a range of theoretical and methodological approaches to interrogate the ways in which alternative schools and alternative education both challenge and legitimate the kinds of schooling most of us expect for our own and other people's children The chapters in this book were originally published as a special issue of *Critical Studies in Education* **Beyond the Boundaries of Traditional and Alternative Education** Giulia Chiara Ceresa, 2023 This thesis proposes an exploration of the geographies of alternative and experimental forms of education in mainstream schools for the first time The research revolves around two main contributions in the first instance it investigates the circuits which guide parents' choices on public schools private schools or schools with alternative experimentation in the second instance it analyses the experiences of the teachers and students in three school networks with experimentation which operate on a national scale As such it sits at the intersection of three wider areas of scholarship children's geographies geography of education geographies of alternative education In order to do this a mixed method qualitative research programme conducted in Italy was implemented It began in the spring of 2020 and after being modified due to the arrival of the COVID 19 pandemic it concluded in the spring of 2021 The methodological programme involved three components 1 The School Of My Dreams an in depth interview composed of open questions for parents who chose alternative learning sites private schools or state schools with alternative experimentation for their children n 40 2 All About Your School a programme for children from the ages of 6 to 10 which proposed the production of a lapbook through which the children expressed their own school experiences n 75 3 What's Education For interviews with key adults who work as teachers and school directors in schools with alternative experimentation n 28 Appropriately the research offers four key contributions 1 Parents choose a school with experimentation a private school or a school outside of the public school system in the hopes of finding a solution which reflects their values and encompasses their vision of education consisting of various dimensions 2 Experimentation within the

public school system must tackle dated buildings which impact on the implementation of the experimentation and forge creative and co productive relationships between the various social and spatial process which define these approaches 3 The relationship between teachers and students has an organisational function in the establishment of the teaching practices 4 The collaboration with informal education associations alternative learning sites and communities which exist in the area is fundamental in the establishment of experimentation in the public school sector and has a double function on one hand it acts as a complement to the training offer supporting the privatisation of certain processes of the public school on another it operates as network of social support increasing the solidarity and connections of the social fabric with the educational community Thanks to the field research conducted in Italy the thesis adds to the amplification of knowledge of the circuits of choice marking the training offer in Italian primary schools which are in constant evolution It also offers a glimpse of some attempts at experimentation within the mainstream and the relative experiences of the children and teachers who inhabit these schools Therefore it contributes to the literature on the geographies of education on children s geographies and at the same time it offers critical issues from an Italian perspective providing ideas and insights to educational policy makers and those who handle building the school of tomorrow

Alternative Schooling, Social Justice and Marginalised Students

Stewart Riddle,David Cleaver,2017-07-14 This book examines the experiences and perspectives of students and teachers at an alternative music school which caters for young learners who have been marginalised and disenfranchised from mainstream schooling The school utilises a rich music infused curriculum that connects to the lives of its students alongside a democratic ethos and ethic of care for members of the school community including the students teachers and parents The combination of personal narratives together with detailed critical discussion provides a compelling argument for how schools can make a major difference to the lives of young people The case study presented in this book offers one potential response to the institutionalised social and educational inequities that young people continue to face and highlights the important lessons from alternative schooling for education more broadly It will be of particular interest to researchers in the areas of education and sociology especially those concerned with matters of social justice and equity in education

Space, Identity and Education Ceri Brown,Michael Donnelly,2023-07-10 This book details an innovative multi scalar framework to examine the intersection of spatial levels in shaping social justice issues in education Including an examination of key dimensions such as geographic divisions between and within countries school design online learning home schooling and student mobility the framework is applied to analyse the interrelation between space identity and education The authors reveal how this novel integration of scales is essential for a more comprehensive and probing understanding of educational inequalities As an example of theoretical interdisciplinarity mobilised to tackle the urgent issues of our time the twin dimensions of space and identity discussed at multi scalar levels provides an invaluable theoretical resource for scholars and students of education sociology and geography

Methodological Advances in Research on Emotion and Education

Michalinos Zembylas, Paul A. Schutz, 2016-03-10 This volume presents different conceptual and theoretical frameworks as well as research methods that have helped educational researchers to study emotions It includes innovative approaches that push the methodological boundaries that have served educational researchers until now and proposes new ways of researching emotions in educational contexts In particular this edited volume provides a historical frame for studying emotions It connects theoretical epistemological views with choice of research methods and describes specific methods helpful in doing research on emotions as they are grounded in different theoretical and disciplinary traditions such as psychology philosophy sociology history political science cultural studies and feminist studies Finally it appreciates the contextual and international dimensions of studying emotions in education and contributes to ongoing debates about the implications of our methodological choices for understanding emotion in education This combination of variety timeliness potential for transformation of the field and uniqueness make this a very valuable resource to introduce new scholars in the field alongside established scholars

Teaching in Alternative and Flexible Education Settings Aspa Baroutsis, Glenda McGregor, Martin Mills, Kitty te Riele, 2019-12-18 Alternative and flexible education settings may come in different forms but they generally have in common a focus on young people who have been disengaged from conventional schooling One challenge of these settings therefore is to change the way education is offered in order to better engage these students Much of the onus for this changed approach is on the staff teachers youth workers and other support staff Therefore the purpose of this book is to examine different aspects of the work of staff in these settings Several common threads run through the chapters in this book highlighting core aspects of the work of staff in these settings A strong sense of commitment to working with and for young people from marginalised backgrounds Validation of the relational and emotional nature of education as a fundamentally people centred enterprise The importance of explicit attention to critical reflection on staff members own positionality assumptions and identity Collegiality as a crucially affirming part of school culture for staff These elements are pertinent to educational settings everywhere The chapters in this book serve as a reminder of what really counts for our young people and their schooling The chapters in this book were originally published as a special issue of *Teaching Education*

Childhoods in Context Clark, Alison, 2013-10-16 *Childhoods in context* offers a critical exploration of childhood drawing attention to the physical and social context of children and young people s lives Three key themes are explored Childhood is always located somewhere The book offers insights into childhood by focusing on places specially designed for children as well as the territories that children develop for themselves Childhood is experienced through objects people and places and through everyday routines Discussions about childhood are rooted in the details of children s lives whether on the street in an institution or in different definitions of home Childhood and adult identities are relational Definitions and understandings of childhood are dependent on how adulthood is viewed These themes are explored through accounts of home and family school public spaces and sites of work in local and global settings They raise questions about

methodological approaches to understanding childhoods in context which is the focus of the concluding chapter This is the third in a series of four books written by experts in the field which provides an introduction to childhood degree programmes and related modules The series features international case studies examples and readings to supplement the chapters and is illustrated in full colour Other books in the series are Understanding childhood a cross disciplinary approach Children and young people s cultural worlds Local childhoods global issues *Alternative Approaches to Education* Fiona

The Power of Place in Play Christina R. Ergler, 2020-03-03 There s nothing really fun about the park in winter Christina Ergler is the first one to explore why play resonates differently across urban localities and seasons She draws on Bourdieu s theory of practice and Gibson s affordance theory to show that determinants of seasonal outdoor play transcend modifiable barriers such as traffic and unsuitable play spaces as well as the inevitable issue of inclement weather In contrast seasonal play determinants are grounded in locally constituted beliefs about what is seasonally appropriate children s activity To foster a healthier and more sustainable life for children outdoor play needs to become convenient all year round in all locations
