The Challenge of Nietzsche Jeremy Fortier, 2020-03-24 Friedrich Nietzsche is one of the most widely read authors in the world from the time of his death to the present as well as one of the most controversial He has been celebrated as a theorist of individual creativity and self care but also condemned as an advocate of antimodern politics and hierarchical communalism Rather than treating these approaches as mutually exclusive Jeremy Fortier contends that we ought instead to understand Nietzsche's complex legacy as the consequence of a self-conscious and artful tension woven into the fabric of his books The Challenge of Nietzsche uses Nietzsche as a guide to Nietzsche highlighting the fact that Nietzsche equipped his writings with retrospective self-commentaries and an autobiographical apparatus that clarify how he understood his development as an author thinker and human being Fortier shows that Nietzsche used his writings to establish two major character types the Free Spirit and Zarathustra who represent two different approaches to the conduct and understanding of life one that strives to be as independent and critical of the world as possible and one that engages with cares for and aims to change the world Nietzsche developed these characters at different moments of his life in order to confront from contrasting perspectives such elemental experiences as the drive to independence the feeling of love and the assessment of one's overall health or well-being Understanding the tension between the Free Spirit and Zarathustra takes readers to the heart of what Nietzsche identified as the tensions central to his life and to all human life

**The Athenaeum**, 1907 The Challenge of World Theatre History Steve Tillis, 2020-09-19 The future of theatre history studies requires consideration of theatre as a global phenomenon The Challenge of World Theatre History offers the first full-scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections It moves beyond the conventional nation-based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history Finally the book outlines a history that recognizes the often-connected developments in theatre across Eurasia and around the world It makes the case that world theatre history is necessary not only for itself but for the powerful comparative and contextual insights it offers to all theatre scholars and students whatever their special areas of interest

**Hollywood or History?** Lisa K. Pennington, Donna Fortune, Mary E. Tackett, Paige Horst, Meghan A. Kessler, 2024-09-01 Teaching and learning through Hollywood or

commercial film and television productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century. However, purposeful and effective instruction through film is not problem free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we are developing a collection of practical classroom ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and where appropriately utilized, foster critical thinking and civic mindedness. The NCSS College Career and Civic Life C3 framework represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-6 teachers of social studies content, by offering a collection of classroom ready tools based on the Hollywood or History strategy and designed to foster inquiry through the careful use of selected motion pictures and television productions.

Geographical Knowledge Construction and Production Archie K. Deen, 2015-09-02. Geographical Knowledge Construction and Production: Teacher and Student Perspectives is a readable and illuminating account of three high school classrooms in suburban Atlanta, Georgia. It challenges the narrow focus of the Advanced Placement AP programme as a tool for admission into colleges and universities in the United States. The research provides insight into the College Board's AP programme and argues for teaching and learning that is transformative and geared toward equipping students with the skills and knowledge necessary to confront the challenges of the 21st century. In particular, it advocates for geographic education that is anchored in the structure of the subject, teasing wherever possible the contradictions and tensions embedded in the complexities of facts relating to people and places. This book is essential reading for professors and students of education, teachers and students of AP courses, parents, administrators, and state and federal agencies vested in the AP programme.
