Globalization is a phenomenon which has attracted much attention in the past but there are still many questions that remain unanswered This book categorizes globalization into three types Financial Globalization the collapse of the Cold War order and the ensuing convergence toward the capitalistic system and the rise of the emerging nations The globalization of capitalism has two implications One is trust in the market economy system and support for a minimal state while another is an aspect of the Casino Capitalism as typically seen by the rampant emergence of hedge funds This book explores both the light and shadows cast by globalization endeavoring to identify both positive and problematic effects of the globalization process on the world economy For this purpose we would first examine the nature and the feature of the world capitalism in relation to globalization Then we would discuss and investigate the path along which important nations first the developed nations the USA EU and Japan followed by the emerging nations BRICs have proceeded under the influence of globalization Focusing on this phenomenon from diverse points of view which is to be taken by the first rank contributors in their fields will be extraordinarily fruitful for understanding not only the world capitalism This collection from a selection of leading international contributors will not only shed light on world capitalism as it is now but will also offer pointers as to its future directions

Back to Maastricht Carlo Spagnolo, Leila Simona Talani, 2021-02-03 European integration has long defied previous notions of state sovereignty and has since the days of the Coal and Steel Community been conferred with original supranational instruments Yet the Treaty of Rome did not raise the same popular reactions as the Maastricht Treaty about the infringement of national sovereignty This book suggests that the end of the Cold War has modified the functions of European integration so that the original ideals of integration have lost part of their appeal hence the birth of the European Union can be regarded as an attempt to seek a new legitimacy How far did the EU Treaty meet this unprecedented challenge

This book argues that the Maastricht Treaty established a constitutional framework for a new kind of polity without resolving the issue of its purpose and scope The volume seeks thus to explain some of the reasons for the defeat of the Constitutional Treaty in 2005 dating them back to the Maastricht Treaty In so doing the book links the actual state of European integration with the decisions taken at Maastricht in five different realms of supranational policy making The first is the constitutional setting of the EU Treaty and its effect on national constitutional law the second is the concept of governance and the changes introduced by the Economic and Monetary Union the third is the historical background of the Maastricht agreement the fourth the political economy of the Economic and Monetary Union the fifth is the impact of European citizenship in the recent case law of the European Court of Justice and the prospects of a EU politicisation The book puts in perspective the solutions to the recent stalemate of the European integration process offered by the Lisbon Treaty

Global Food Value Chains and Competition Law Ioannis Lianos, Alexey Ivanov, Dennis Davis, 2022-05-05 The food industry is a notoriously complex economic sector that has not received the attention it deserves within legal scholarship Production and distribution of food is complex because of its polycentric character as it operates at the intersection of different public policies and its dynamic evolution and transformation in the last few decades from technological and governance perspectives This volume introduces the global value chain approach as a useful way to analyse competition law and applies it to the operations of food chains and the challenges of their regulation Together the chapters not only provide a comprehensive mapping of a vast comparative field but also shed light on the intricacies of the various policies and legal

fields in operation The book offers a conceptual and theoretical framework for competition authorities companies and academics and fills a massive gap in the competition policy literature dealing with global value chains and food
