

International Relations Research Paper

International Relations (IR) is the study of relationships between countries. The author in this reading goes into detail on the origins of IR and how they fit into our society today. Key topics that are talked about are state sovereignty, state system, the security dilemma, hegemony, balance of power. IR can affect many things from wars to the economy, as was seen with WWII and The Great Depression. The main reason we study IR is the fact that the entire population of the world is living independent states. Together these states form a global system.

States are independent of each other, but that does not mean that they do not rely on each other. Most states find a way to co-exist simply because of international markets, which effects the wealth and welfare of their citizens. When states are isolated and cut off by the state system, the people usually suffer as a result, ie Burma, North Korea, Iraq. IR conventionally dates back to the early modern era (sixteenth and seventeenth centuries) in Europe, sovereign states were initially established. Most states are friendly and peace loving, but a few states may be hostile.

This usually leads to the age old problem of national security. Most states have a military, this allows the states to co-exist without intimidation from another. Unarmed states are very rare and many states enter into alliances with other states to increase their national security. Three other basic values states are usually expected to uphold are freedom, order and justice. Freedom is expected by the people because of the sacrifices they have to make to their country such as paying taxes and military service. In return the people expect a free country. States have a common interest in establishing and maintaining international order so that they can co-exist and interact on a basis of stability. States are also expected to uphold international law.

There have been moments in modern history that have shown us how the basic values of IR can effect our lives. One such case is the oil shock during the 1970s when it became clear that North American motorists rely heavily on overseas oil suppliers and that conflict in these countries can effect the price at the pumps in ours. The IR state system is not without its flaws, countless men, woman, and children in third world countries suffer from no education to hungry. For this reason the state systems credibility to provide the very basics for its people is put into question. Some even say the international system tolerates human suffering and that the system should be changed so everyone can flourish.

This has lead to discussions on alternative IR theories. Like anything the state system has its advantages and disadvantages. The state system is not something that has to exist, in fact like many social organizations it can come or go during a certain time in history. Even thou the state system didn't come into ffect until the sixteenth and seventeenth centuri
