

11. Explain (in one or two lines) the function of the followings:
 - (a) Promoter
 - (b) tRNA
 - (c) Exons
11. (a) Promoter defines the start process of the transcription and is located at the start of the strand. It also provides binding site to RNA polymerase.
 (b) tRNA or transfer RNA is a type of RNA that brings amino acids and reads the genetic code.
 (c) Exons are the coding sequences or expressed sequences in eukaryotes.
12. Why is the Human Genome project called a mega project?
12. Human genome project was considered to be a mega project because it had a specific goal to sequence every base pair present in the human genome. It took around 13 years for its completion and got accomplished in year 2006. It was a large scale project, which aimed at developing new technology and generating new information in the field of genomic studies. As a result of it, several new areas and avenues have opened up in the field of genetics, biotechnology, and medical sciences. It provided clues regarding the understanding of human biology.
13. What is DNA fingerprinting? Mention its application.
13. DNA Fingerprinting is a technique to find out variations in individuals of a population at DNA level.
 Its applications are as follows:
 - (i) Used in forensic science to identify suspects
 - (ii) Used to find out history of an organism
 - (iii) Used to find out paternity and family relations.

Petersen, 2023-07-03 While Active Learning Classrooms or ALCs offer rich new environments for learning, they present many new challenges to faculty because among other things they eliminate the room's central focal point and disrupt the conventional seating plan to which faculty and students have become accustomed. The importance of learning how to use these classrooms well and to capitalize on their special features is paramount. The potential they represent can be realized only when they facilitate improved learning outcomes and engage students in the learning process in a manner different from traditional classrooms and lecture halls. This book provides an introduction to ALCs, briefly covering their history and then

synthesizing the research on these spaces to provide faculty with empirically based practical guidance on how to use these unfamiliar spaces effectively Among the questions this book addresses are How can instructors mitigate the apparent lack of a central focal point in the space What types of learning activities work well in the ALCs and take advantage of the affordances of the room How can teachers address familiar classroom management challenges in these unfamiliar spaces If assessment and rapid feedback are critical in active learning how do they work in a room filled with circular tables and no central focus point How do instructors balance group learning with the needs of the larger class How can students be held accountable when many will necessarily have their backs facing the instructor How can instructors evaluate the effectiveness of their teaching in these spaces This book is intended for faculty preparing to teach in or already working in this new classroom environment for administrators planning to create ALCs or experimenting with provisionally designed rooms and for faculty developers helping teachers transition to using these new spaces
