Using Apps for Learning Across the Curriculum Richard Beach, David O'Brien, 2014-10-17 How can apps be used to foster learning with literacy across the curriculum? This book offers both a theoretical framework for considering app affordances and practical ways to use apps to build students' disciplinary literacies and to foster a wide range of literacy practices. *Using Apps for Learning Across the Curriculum* presents a wide range of different apps and also assesses their value, features, methods for, and apps related to planning instruction and assessing student learning. It identifies favorite apps whose affordances are most likely to foster certain disciplinary literacies, includes resources and apps for professional development, provides examples of student learning in the classroom. A website www.usingipads.pbworks.com with resources for teaching and further reading for each chapter, a link to a blog for continuing conversations about topics in the book, appsforlearningliteracies.com, and more enhance the usefulness of the book.

Computers Helping People with Special Needs Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, 2003-08-02 Success and efficiency are the latest standards and scales of our society. Virtual surroundings and communication rooms, electronic portals and platforms are pushing us into a new world of personal and professional interaction and cooperation. The network to subdue violence is fragile and crumbling; tradition is no longer a power of our community. What of leisure time, dreams, and fantasy? What of education in the family, at school, and at university? Travelling round the world to develop yourself, how man becomes man, pleading for a new determination of the idea of education, a mission of past centuries inadequate nowadays. Regarding September 11th last year, the conflicts and confrontations round the globe and events in our direct surroundings, these questions seem to be a cry at least to reflect upon what is happening around us and where we all of us still play an active role. An International Conference on Computers Helping People with Special Needs is like an island. Is this a topic at all these days? Is it worth discussing the area of ICT and the situation of people with disabilities, persons who are

segregated from developing their personal and professional careers Indeed the biennial meeting has never included these actualities but the basic idea behind ICCHP starting in 1989 was to focus on these fringe groups and to offer a platform of exchange on all aspects of Human Computer Interaction and the usage of ICT for people with special needs

and Innovation (ISMEI 2022) Farida Nurhasanah, Russasmita Sri Padmi, 2023-08-26 This is an open access book Numeracy has become the current buzzword in the world of Indonesian mathematics education since the Ministry of Education and Culture Research and Technology of the Republic of Indonesia Kemdikbudristek RI launched the Minimum Competency Assessment Asesmen Kompetensi Minimum AKM program Together with literacy numeracy is the minimum competency measured in the AKM This policy is expected to foster a learning culture that places students as the main focus as well as the shift of the paradigm from simply teaching the content to developing the students competence in a constructive and adaptive manner Currently there are still many mathematics teachers who are not familiar with numeracy which is followed by various misconceptions and misinformation One of the efforts of the SEAMEO Regional Centre for QITEP in Mathematics or commonly called SEAQIM in supporting teacher professionalism is through the International Symposium on Mathematics Education and Innovation ISMEI This symposium is initiated by SEAQIM and is held every two years This activity is a space for disseminating works and exchanging ideas about innovations in mathematics education for teachers education staff policy makers and related stakeholders In 2022 ISMEI will be held for the seventh time with the theme being Transforming Education by Reimagining Numeracy Learning Through this theme ISMEI invites education practitioners to transform education by reviewing mathematics learning practices to develop numeracy and discussing its potential in the future

The Handbook of Educational Theories Beverly Irby, Genevieve H. Brown, Rafael Lara-Alecio, Dr. Shirley A. Jackson, 2013-03-01 Although educational theories are presented in a variety of textbooks and in some discipline specific handbooks and encyclopedias no publication exists which serves as a comprehensive consolidated collection of the most influential and most frequently quoted and consulted theories There is a need to put such theories into a single easily accessible volume A unique feature of the Handbook is the way in which it conveys the theories The organization of the chapters within each section makes the volume an easy to use and understandable reference tool as researchers and practitioners seek theories to guide their research and practice and as they develop theoretical frameworks In addition to the traditional theories presented the Handbook includes emerging theories for the 21st Century as well as presenting practical examples of the use of these theories in research from dissertations and published articles An appendix which indicates which theories have instruments associated with them and where those instruments can be found is also included The Handbook consists of 12 sections Section I provides the introduction with a focus on what constitutes good theory as well as how theory guides research and practice The remaining sections address Philosophical Educational Constructs Learning Theory Instructional Theory Curriculum theory Literacy and Language Acquisition Theory Counseling Theory Moral Development Theory Classroom Management Theory Assessment Theory Organizational Theory and Leadership Management Theory Each section consists of an overview written by the section editor of the general theoretical concepts to be addressed by the chapter authors Each chapter within the section will include a description of the theory with goals assumptions and

aspects particular to the theory b the original development of and interactions of the theory c validation of the theory d generalizability of the theory across cultures ethnicities and genders e the use and application of the theory f critiques of the theory g any instruments associated with the theory and h two to five particular studies exemplifying particular theories as individuals have used them in theoretical framework of dissertations or published articles and be written by the original theorist or prominent contributors to the theory The Handbook is intended for graduate students enrolled in research courses or completing theses and dissertations Additionally professors of all educational disciplines in the social sciences would be an interested audience There is also potential use of the text as administrators counselors and teachers in schools use theory to guide practice As more inquiry is being promoted among school leaders this book has more meaning for practitioners
