Monitoring Report 2008 the fifth in an annual series is essential reading for those who wish to follow the global development agenda and debate in 2008 The year marks the midpoint toward the 2015 deadline for achieving the Millennium Development Goals MDGs It is also an important year to work toward a consensus on how the world is going to respond to the challenge of climate change building on the foundation laid at the Bali climate change conference in December 2007 The report spans this agenda It provides a comprehensive assessment of progress toward the MDGs and related policies and actions It addresses the challenge of climate change and environmental sustainability and assesses its implications for development The report s assessment of MDGs at midpoint presents a mixed picture one of both significant progress and formidable challenges The first MDG reducing extreme poverty by half is likely to be met at the global level thanks to a remarkable surge in global economic growth over the past decade But on current trends the human development MDGs are unlikely to be met Prospects are gravest for the goals of reducing child and maternal mortality but shortfalls are also likely in the primary school completion nutrition and sanitation MDGs The potential effects of climate change compound the challenge of achieving the development goals and sustaining progress The report s messages are clear urgent action is needed to help the world get back on track to achieve the MDGs and urgent action is also needed to combat climate change that threatens the well being of all countries but particularly of poor countries and poor people The goals of development and environmental sustainability are closely related and the paths to those goals have important synergies Education for All Global Monitoring Report 2008 United Nations Educational, Scientific and Cultural Organization (UNESCO),2007-11-29 Working towards the 2015 millennium development goals this global report marks the midterm point and provides a rich evidence based assessment of the provision of education on a global scale Based on specialized commissions extensive consultations and multiple research sources the report provides an authoritative comparative reference *Global Monitoring Report 2009* World Bank,2009-04-27 A Development Emergency the title of this year s Global Monitoring Report the sixth in an annual series could not be more apt The global economic crisis the most severe since the Great Depression is rapidly turning into a human and development crisis No region is immune The poor countries are especially vulnerable as they have the least cushion to withstand events The crisis coming on the heels of the food and fuel crises poses serious threats to their hard won gains in boosting economic growth and reducing poverty It is pushing millions back into poverty and putting at risk the very survival of many The prospect of reaching the Millennium Development Goals MDGs by 2015 already a cause for serious concern now looks even more distant A global crisis requires a global response The crisis began in the financial markets of developed countries so the first order of business must be to stabilize these markets and counter the recession that the financial turmoil has triggered At the same time strong and urgent actions are needed to counter the impact of the crisis on developing countries and help them restore strong growth while protecting the poor Global Monitoring Report 2009 prepared jointly by the staff of the World Bank and the International Monetary Fund provides a
