

GLOBAL WARMING

You must have heard about Global Warming somewhere. Do you know what that means? Due to human activities the average temperature of planet Earth is increasing. But what is so harmful about a little increase in temperature? Temperature always keeps on changing. There is nothing new about it. So why is everyone talking about this?

Today we all depend of technology for everything. And tech is powered by electricity. But where does all this electricity come from. A large portion of this electricity is produced by burning fossil fuels. Some examples of fossil fuels are coal, oil and natural gas. Most of our vehicles also run on petroleum. Burning of fossil fuels releases lots of pollutants in the Earth's atmosphere. A large part of these pollutants are greenhouse gases like carbon dioxide and methane. Greenhouse gases trap sunlight and heat the Earth's atmosphere. These gases are necessary to maintain livable conditions on Earth. But when we increase the amount of green house gases in the atmosphere, it causes excess increase in temperature.

This increase in temperature is very harmful for our planet and every species living on it. Our scientists have found lots of devastating effects of Global Warming. Increasing temperature causes glaciers to melt and disappear. The ice sheets of Arctic ocean are getting smaller every year. This is destroying the habitats of animals like polar bears and penguins. Due to this sea level increases and causes flooding in coastal areas. Increasing temperature causes heat waves and disruption of many natural habitats. Climate change at such a large scale could give rise to new types of diseases and epidemic, which would be fatal for survival of humans on this planet.

To solve this major problem we need to stop releasing Greenhouse gases in the atmosphere. We should switch to clean and renewable sources of energy like Solar and Wind energy. We can use electric cars instead of those that run on fossil fuels. We can also build machines that could capture and store carbon in the atmosphere. If we want to protect life on our beautiful blue planet, we need to really solve this climate problem.

Name: _____ Date: _____

GLOBAL WARMING

- | | |
|--|---|
| Q.1 Which of the following is an effect of global warming? | Q.3 What happens when we burn fossil fuels? |
| a. Melting ice | a. Atmosphere is cleaned. |
| b. Rising sea levels | b. We release carbon into the air. |
