Globalization Opposing Viewpoints:

Globalization Sara M. Hamilton, 2008-07-01 Examines numerous viewpoints on the topic of globalization
Globalization and Media Jack Lule, 2017-11-17 The fully updated third edition of this lively and accessible book argues for the central role of media in understanding globalization Indeed Jack Lule convincingly shows that globalization could not have occurred without media From earliest times humans have used media to explore settle and globalize their world In our day media has made the world progressively smaller as nations and cultures come into increasing contact Decades ago Marshall McLuhan prophesied that media technology would transform the world into a global village Slowly fitfully his vision is being fulfilled The global village however is not the blissful utopia that McLuhan predicted Nor in a more modern formulation is the world flat with playing fields leveled and opportunities for all Instead Lule argues globalization and media are combining to create a divided world of gated communities and ghettos borders and boundaries suffering and surfeit beauty and decay surveillance and violence By breaking down the economic cultural and political impact of media and through a rich set of case studies from around the globe the author describes a global village of Babel invoking the biblical town punished for its vanity by seeing its citizens scattered its language confounded and its destiny shaped by strife

Critical Perspectives on Free Trade and Globalization Bridey Heing, 2017-12-15 Technology and travel have connected the world like never before making it easier than ever to trade goods and culture across borders But with the ease of trade has come questions about how best to use this increased connection and how all parties can benefit while protecting the world's most vulnerable workers This book will introduce students to the debate surrounding free trade and globalization to help them understand the nature of international commerce cultural exchanges brought on through trade and how the international economy is evolving

Globalization and Families Bahira Trask, 2009-12-01 As our world becomes increasingly interconnected through economic integration technology communication and political transformation the sphere of the family is a fundamental arena where globalizing processes become realized For most individuals family in whatever configuration still remains the primary arrangement that meets certain social emotional and economic needs It is within families that decisions about work care movement and identity are negotiated contested and resolved Globalization has profound implications for how families assess the choices and challenges that accompany this process Families are integrated into the global economy through formal and informal work through production and consumption and through their relationship with nation states Moreover ever growing communication and information technologies allow families and individuals to have access to others in an unprecedented manner These relationships are accompanied by new conceptualizations of appropriate lifestyles identities and ideologies even among those who may never be able to access them Despite a general acknowledgement of the complexities and social significance inherent in globalization most analyses remain top down focused on the global economy corporate strategies and political streams This limited perspective on globalization has had profound implications for

understanding social life The impact of globalization on gender ideologies work family relationships conceptualizations of children youth and the elderly have been virtually absent in mainstream approaches creating false impressions that dichotomize globalization as a separate process from the social order Moreover most approaches to globalization and social phenomena emphasize the Western experience These inaccurate assumptions have profound implications for families and for the globalization process itself In order to create and implement programs and policies that can harness globalization for the good of mankind and that could reverse some of the deleterious effects that have affected the world s most vulnerable populations we need to make the interplay between globalization and families a primary focus **Globalization,**

Self-Determination and Violent Conflict V. FitzGerald,F. Stewart,R. Venugopal,2006-05-05 The authors show that with violent conflict in the developing world as the critical issue for the twenty first century and conflict prevention a central security problem for the developed and developing world self determination movements can only be understood and conflict prevented in the context of global economic and cultural forces **Globalization Contested** Louise Amoore,2002 This exciting book available in paperback for the first time provides an illuminating account of contemporary globalisation that is grounded in actual transformations in the areas of production and the workplace It reveals the social and political contests that give global its meaning by examining the contested nature of globalisation as it is expressed in the restructuring of work Rejecting conventional explanations of globalisation as a process that automatically leads to transformations in working lives or as a project that is strategically designed to bring about lean and flexible forms of production this book advances an understanding of the social practices that constitute global change Through case studies that span from the labour flexibility debates in Britain and Germany to the strategies and tactics of corporations and workers the author examines how globalisation is interpreted and experienced in everyday life Contestation she argues is about more than just direct protests and resistances It has become a central feature of the practices that enable or confound global restructuring This book offers students and scholars of international political economy sociology and industrial relations an innovative framework for the analysis of globalisation and the restructuring of work **Globalization and the Least Developed Countries** David

Bigman,2007-01-01 This book evaluates the policies of least developed countries LDCs and the decisions that they now face against the backdrop of the changes in the structure of the global economy and in the globalization process itself It analyses possible scenarios and alternative trade and growth policies that are likely to affect the LDCs and their poor population in order to draw lessons for future policies The book has 6 chapters and a subject index *Garbage and Recycling* Candice L. Mancini,2010-11-24 Editor Candice L Mancini uses a series of thought provoking essays to take readers across the globe exploring international issues relating to garbage and recycling Is E waste dangerous in India Is the Nile being ruined by pollution Is Serbia doing enough to focus on their waste problems Is Bangladesh s capital swimming in waste How is China turning trash into art Readers will explore these questions They will learn whether Mexico City is running out of places to

dump waste and whether the U S has a serious issue with plastic bags Other cultures explored include Canada Japan Australia Spain the Philippines and Sweden One final treat for readers is they ll explore garbage and recycling in space

Globalization in Southeast Asia Shinji Yamashita,Jeremy Seymour Eades,2003 The rapid postwar economic growth in the Southeast Asia region has led to a transformation of many of the societies there together with the development of new types of anthropological research in the region Local societies with originally quite different cultures have been incorporated into multi ethnic states with their own projects of nation building based on the creation of national cultures using these indigenous elements At the same time the expansion of international capitalism has led to increasing flows of money people languages and cultures across national boundaries resulting in new hybrid social structures and cultural forms This book examines the nature of these processes in contemporary Southeast Asia with detailed case studies drawn from countries across the region including Indonesia Malaysia the Philippines Singapore and Thailand At the macro level these include studies of nation building and the incorporation of minorities At the micro level they range from studies of popular cultural forms such as music and textiles to the impact of new sects and the world religions on local religious practice Moving between the global and the local are the various streams of migrants within the region including labor migrants responding to the changing distribution of economic opportunities and ethnic minorities moving in response to natural disaster

Globalization JoAnn Chirico,2013-08-01 This groundbreaking text on globalization provides a comprehensive and enlightening overview of globalization issues and topics Emphasizing the theory and methods that social scientists employ to study globalization the text reveals how macro globalization processes impact individual lives from the spread of scientific discourse to which jobs are more or less likely to be offshored The author presents a clear image of the big globalization picture by skillfully exploring piece by piece a myriad of globalization topics debates theories and empirical data Compelling chapters on theory global civil society democracy cities religion institutions sports education and health care along with three chapters on global challenges help readers develop a broad understanding of key topics and issues Throughout the text the author encourages readers to relate their personal experiences to globalization processes allowing for a more meaningful and relevant learning experience
