

Rainwater Step by Step Installation Guide - GUTTERING

- * To position the running outlet accurately, hold a plumb line against the fascia directly over the drain.
- * Mark the position on the fascia with a pencil.
- * Fit the outlet no more than 50mm below the level of the roof tiles.

- * Fit a fascia bracket just below the top of the fascia board at one end of the run of guttering (opposite end of the outlet).
- * Tie a plumb line (string) around the base of the bracket.

- * Stretch the plumb line from the bracket along the fascia board and tie it to the outlet.
- * Using a spirit level, check that there is a fall towards the outlet (1.350 is recommended) to encourage water to drain efficiently.

- * Mark the position of the fascia brackets, spacing them no more than 800mm apart (600mm in areas of heavy snowfall) and no more than 150mm from any angle or stopend.

- * Fix the rest of the fascia brackets

RECOMMENDED:
Use two 25mm x 5mm roundhead brass or zinc screws when fitting fascia brackets.

- * Starting at the outlet, fit the first length of gutter using the 'back to front' rule (see below).
- * Fit a union bracket at the other end of the first length and screw it into the fascia, then fit the next length of gutter into it.
- * Continue joining lengths.
- * Make sure all joints line up with the insertion depth marked in the fittings.

REMEMBER:
Start by planning your installation using component diagrams to assist you in selecting the correct materials.

- * Cut the last section of gutter to fit using a hacksaw and fit a stopend.

"Back to Front" Rule:

Tilt the gutter to fit under the back clip and snap in at the front.
