John Ikenberry, 2020-01-14 A multifaceted portrait of the Hiroshima bombing and its many legacies On August 6 1945 in the waning days of World War II the United States dropped an atomic bomb on the Japanese city of Hiroshima The city's destruction stands as a powerful symbol of nuclear annihilation but it has also shaped how we think about war and peace the past and the present and science and ethics The Age of Hiroshima traces these complex legacies exploring how the meanings of Hiroshima have reverberated across the decades and around the world Michael D Gordin and G John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon As an event Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath As a phenomenon it marked a revolution in science politics and the human imagination the end of one age and the dawn of another The Age of Hiroshima reveals how the bombing of Hiroshima gave rise to new conceptions of our world and its precarious interconnectedness and how we continue to live in its dangerous shadow today Cat's Cradle (Study Guide) BookCaps Study Guides Staff, 2011 The perfect companion to Kurt Vonnegut's Cat's Cradle this study guide contains a chapter by chapter analysis of the book a summary of the plot and a guide to major characters and themes BookCap Study Guides do not contain text from the actual book and are not meant to be purchased as alternatives to reading the book We all need refreshers every now and then Whether you are a student trying to cram for that big final or someone just trying to understand a book more BookCaps can help We are a small but growing company and are adding titles every month

Manufacturing Technology Transfer Yasuo Yamane, Tom Childs, 2018-10-08 Based on a bestselling book originally published in Japanese Manufacturing Technology Transfer A Japanese Monozukuri View of Needs and Strategies offers time tested methods and little known tips for achieving successful transfer of technology along with the skills required to operate that technology Designed to support a series of lectures on technology transfer within a master's course on the management of technology it presents the results of years of research carried out at Hiroshima University The book delves into the authors

decades of experience transferring technology between Japan and the rest of the world particularly to developing countries from where much of the world's future economic growth is expected. It contains case studies of successful technology transfers from both the ship building and food equipment industries. Its wide reaching coverage examines methods of skill transfer, production management and manufacturing company classification. Introducing readers to the engineering activities that occur within the manufacturing industry, the book illustrates the engineering technology activities involved in manufacturing along with the production management activities required to support them. It also explains how job simulators can help shorten learning times in the manufacturing industry in the same way that flight simulators are used to teach flying skills to pilots. The book outlines a framework for teaching and learning processes that can be visualized in terms of an S shaped learning curve. It explains how technology transfer overseas should be supported by contractual agreements between the parties concerned. Detailing the legal contractual responsibilities for all parties involved, it also describes what you should do if problems arise during the transfer. Integrating previously unpublished research results with illustrative case studies, this book is suitable for a wide audience within the manufacturing industry including manufacturing engineering students in both developed and developing countries, those responsible for the development of manufacturing engineers in industry and elsewhere, and anyone interested in the international activities of Japanese manufacturing companies.

Frameworks for Market Strategy Noel Capon, Frank Go, 2016-12-08

Frameworks for Market Strategy helps students understand how to develop and implement a market strategy and how to manage the marketing process. Marketing activity is the source of insight on the market, customers and competitors, and lies at the core of leading and managing a business. To understand how marketing fits into the broader challenge of managing a business, Capon and Go address marketing management both at the business and functional levels. The book moves beyond merely presenting established procedures, processes and practices, and includes new material based on cutting edge research to ensure students develop strong critical thinking and problem solving skills for success. In this European edition, Capon and Go have retained the strong framework of the book but have updated the cases, examples and discussions to increase the book's relevance for students outside the USA. Key features include:

- A strong strategic focus
- teaching students how to analyze markets, customers and competitors to plan, execute and evaluate a winning market strategy.
- Practical examples from a range of contexts, allowing students to develop the skills necessary to work in for profit, public or non profit firms.
- Emphasis on understanding the importance of working across organizational boundaries to align firm capabilities.
- Full chapters devoted to key topics including brand management, digital marketing, marketing metrics and ethical as well as social responsibilities.
- Focus on globalization with a chapter on regional and international marketing.
- Multiple choice, discussion and essay questions at the end of each chapter.
- Offering an online instructor's manual and a host of useful pedagogy including videos, learning outcomes, opening cases, key ideas, exercises, discussion questions, a glossary and
