

## ► Model Narrative

Read the following model of a historical narrative about the presidential debate in 1960, between John F. Kennedy and Richard M. Nixon. Notice that it includes the characteristics you have learned.

### The First Televised Presidential Debate

The central character describes his surroundings.

Normally my job is pretty routine, but I saw something tonight that I'll remember for a long time. I'm a cameraman, and tonight I worked at WBBM Studios in Chicago, where the first presidential debate took place between Vice President Nixon and Senator Kennedy.

This first debate has turned into a big deal. The whole setup for the debate was really brand new, since the television networks all gave an hour of free time—no commercials. President Eisenhower even signed a special law to allow it. So it was definitely a very big deal.

The writer included historical events in the narrative.

When I got to the station late this afternoon, everyone seemed pretty keyed up. I was too—I was really worried about not making any mistakes. I was really excited when the two candidates arrived. Vice President Nixon got there first, with a Secret Service man. Nixon wore a baggy-looking gray suit that made him blend into the back wall. Not good. His shirt collar looked too big, and I remember that he'd had some kind of bad leg injury a few weeks before, so maybe he lost weight in the hospital. Also not good.

The writer blends fiction and nonfiction to create the narrative.

Then Senator Kennedy came. Kennedy seemed younger than Nixon and was definitely healthier looking — all tanned. His suit was dark blue, which contrasted well with the gray wall. Kennedy wore a white shirt, which looked great with his dark suit and tan. But white is terrible on television, since it starts to glow. Someone had to get him a light-blue shirt. The director offered the candidates makeup. The Vice President said "No" (bad idea, since he was pretty pale). But the senator, who was already tanned, thought he wanted some (smart—it keeps your face from showing sweat).

**Analysing Historical Narratives** Stefan Berger, Nicola Brauch, Chris Lorenz, 2021-05-14 For all of the recent debates over the methods and theoretical underpinnings of the historical profession scholars and laypeople alike still frequently think of history in terms of storytelling Accordingly historians and theorists have devoted much attention to how historical narratives work illuminating the ways they can bind together events shape an argument and lend support to ideology From ancient Greece to modern day bestsellers the studies gathered here offer a wide ranging analysis of the textual strategies used by historians They show how in spite of the pursuit of truth and objectivity the ways in which historians tell their stories are inevitably conditioned by their discursive contexts Teaching Historical Narratives Jon A. Levisohn, 2024-11-28 With this book Jon Levisohn argues that current history education is set up in a way that sees students of history at one end of a continuum with the academic experts in the field of history at the other and where the goal of history education is to help students to think like historians Building on a critical engagement with Carl Hempel Hayden White and David Carr as well as contemporary work in virtue epistemology Levisohn proposes a new theory of historiography which serves as a set of guidelines for the teaching and learning of history According to the theory the work of historiography is best characterized as a negotiation among narratives weaving together received narratives with new information and ideas in order to construct a new narrative This negotiation happens with a particular orientation towards negative evidence or flexible disconfirmationism and is assessed according to the openness sensitivity responsibility creativity boldness and humility i e the virtues of historical interpretation The book rethinks the work of history education offering new ways of thinking about the goals of the teaching of history namely in terms of the cultivation of the interpretive virtues **Historical Narratives** Mariana Imaz-Sheinbaum, 2023-10-27 This book explains some of the psychological processes that go into narrative construction and why it is that we have so much variability of historical accounts about a single historical event A central focus of this book is how historians go from having unconnected units of data to having a coherent structured and organized flow of experiences The author argues that the way these connections are established responds to certain Gestalt psychological principles that allow us to understand not only how histories are constructed but also how this construction can be rather different depending on how these principles are applied To illustrate how these principles are present in histories the author analyzes classic historical writers such as Burckhardt Huizinga Vico and Marx As well as an explanation of why historical multiplicity happens the book also offers a way to evaluate different historical narratives about the same historical event To illustrate how the evaluative framework is at play the author analyzes two views about the so called discovery of America The first one explains what happens in 1492 by using the term discovery The second one uses the notion of invention to talk about the same set of circumstances The book provides an important epistemic tool to evaluate these different accounts one that can be applied not only to this case but also others This book appeals to scholars graduate

students and upper level undergraduate students of history and philosophy In addition the book may also attract intellectuals generally considered who are interested in how philosophy can inform and question historical practice     **Native American Life-history Narratives** Susan Berry Brill de Ramírez,2007 The author provides methods for the study of American Indian ethnographic texts and disputes some previous assumptions about the sources of the stories in Son of Old Man Hat

*Historical literatures* Noelle Gallagher, 2018-04-30 Historical literatures recovers a rich vibrant and complex tradition of Restoration and early eighteenth century English historical writing Highlighting the wide variety of historical works being printed and read in England between the years 1660 and 1740 it demonstrates that many of the genres that we now view primarily as literary verse satire and panegyric memoir scandal and chronicle were also being used to represent historical phenomena In surveying some of this period's historical literatures it argues that many satirists secret historians and memoirists made their choice of historical subject matter a topic of explicit commentary presenting themselves as historians or inscribing their works in an English historical tradition By responding to other varieties of history in this self conscious way writers like Andrew Marvell John Dryden Delarivier Manley Daniel Defoe and John Evelyn were able to pioneer influential new techniques for representing their nation's past

*History, Fiction, and Germany* Brent Orlyn Peterson, 2005 A study of the content development and transmission of German identity during the nineteenth century as Germany s national narrative took shape in historical fiction and in both popular and academic history The German speaking inhabitants of central Europe did not automatically think of themselves as Germans not before 1871 and not always after unification In fact they spoke mutually incomprehensible dialects owed allegiance to different leaders worshiped in different churches and would not have recognized each other s customs If asked about their identity these prospective Germans might have answered Austrian Bavarian or Prussian and they could as easily have used more local labels or resorted to occupational markers For this disparate population to think of itself as German that word had to acquire content people had to learn a whole set of stories they could tell themselves and to others in answer to the question of identity History Fiction and Germany chronicles how German nationalism developed simultaneously with the historical novel and the field of history both at universities and in middlebrow reading material The book examines Germany s emerging national narrative as nineteenth century writers adapted it to their own visions and to changing circumstances These writers found and popularized the nation s heroes and heroines demonized its villains and enemies and projected the nation s hopes and dreams for the future Author Brent O Peterson argues that it was the production and consumption of national history the writing and reading of the nation that filled Germany with Germans Although the task of national narration was never complete and never produced a single universally accepted version of German national identity tales from Germans gradually shared history did more to create Germany than any statesman general or philosopher History Fiction and Germany provides a valuable resource for scholars and students of German studies as well as anyone interested in history and the articulation of national identity
