India-Africa Economic Relations in the New Global Economy Rick Rowden,2025-03-18 While there have been many books about China s growing economic role in Africa this book explores the much less well known story of India s growing economic role in Africa And like the big debates about China s role in Africa this book similarly asks if India is acting as a helpful development partner in Africa an exploitative new colonizer or if the answer ultimately has to do with the degree of agency exercised by African governments While the book documents the significant increase in Indian aid trade and FDI in Africa in the new millennium it also offers much more It comprehensively looks at theories of economic development the debates about the role of trade and industrial policies in economic

development strategies colonial and post colonial literature and controversial features of today's global political economy as the background to study Africa and frames Africa India economic relations in these broad contexts The book reviews the history of India's diplomacy trade and investment in African countries since decolonization with a focus on the increased economic ties of the past two decades The main question examined is about the longterm impact that India's economic relations are having in African economies and if India is helping Africa to successfully develop over time or not The author examines India's economic and strategic interests in the African region and offers a comparative analysis of Africa's trade with India China the European Union and other African nations The book also explores a number of outstanding issues in India Africa relations today such as Africa's role as a source of oil gas and critical minerals needed by India the lifesaving role of Indian generic medicines across the continent the nature of the agricultural development model that India is introducing in Africa and key areas where Indian and African governments are cooperating in the international arena The book offers a critical and in depth look into the partnerships India has developed with African countries and contributes to the debate on economic relations between a more developed emerging market like India and less developed countries A major contribution to the emerging area of South South economics this book part of the Critical Political Economy of South Asia series will be useful for scholars and researchers of economics development economics development studies public policy diplomacy African studies political economy South Asian economics and international politics and trade

The Economics of the Global Response to HIV/AIDS Markus Haacker,2016-09-01 The global response to HIV AIDS has been a major aspect of global health and development policy over the last three decades The book illustrates the devastating health impacts of the epidemic with life expectancy in some countries falling to the lowest levels observed anywhere and the remarkable success of the global HIV AIDS response in reversing such extreme outcomes Concerns about the implications of HIV AIDS for economic development have played a role in motivating the global HIV AIDS response However evidence on the impacts of HIV AIDS on economic growth or poverty is weak and the magnitude and relevance of such economic effects appears trivial compared to the consequences for life and health Because of the success in extending access to treatment globally HIV AIDS has effectively transitioned into a chronic disease This means that HIV AIDS absorbs not only a substantial chunk of current global and national financial resources but that these spending needs are projected to persist over decades The costs of the HIV AIDS response thus resemble a long term financial liability shaped by past and current policies Relatedly the calculus of cost effectiveness of HIV AIDS interventions has changed People who become infected with HIV can now expect to not die because of AIDS at the same time each HIV infection results in medical needs and expenditures extending over decades The book presents a framework for integrating these financial consequences and the transmission dynamics of HIV in the analysis of cost effectiveness of HIV AIDS interventions and in the design of HIV AIDS programs

Measuring the Unmeasurable in Education Elaine Unterhalter,2020-04-28 Debates around quality versus quantity in education can generate controversy

about how quality is measured Many question the drive to delineate and quantify precisely what works suggesting that much value either cannot be measured or is distorted by measurement This book explores how we can understand measurement in areas of education policy planning and practice that have not previously been considered measurable The contributors ask four main questions What do we measure and not measure when we try to measure the unmeasurable in education When attempts have been made to measure the unmeasurable in education what metrics have been adopted in which contexts and with what outcomes Why have measures been adopted as indicators of the unmeasurable such as human rights And how have particular organisations approached the problem of measuring the apparently unmeasurable in education with what epistemological normative and conceptual resources and consequences The book draws on analyses from philosophy history sociology and economics with insights from national and international contexts The contributions consider philosophical distinctions historical experiences and contemporary reflections on how to refine existing approaches to measurement of poverty capability rights and the benefits of education The discussion shows how measuring the unmeasurable takes account of the inequalities complexities and uncertainties of work in education thus suggesting a considerable deepening of the notion of education quality and measurement This book was originally published as a special issue of Comparative Education

Learning for a Better Future Suzanne Hattingh, 2021-12-31 Various international scholars and associates of the PASCAL Place Social Capital and Learning Regions International Observatory Africa hub under the auspices of the Centre for Local Economic Development CENLED based at the University of Johannesburg UJ have contributed chapters in this scholarly book The book aims to demonstrate how a combination of globalisation pandemics and the impact of innovation and technologies are driving towards a world in which traditional ideas are being challenged The book carries forward a dual context and relevance to South African social educational economic and cultural development and the broader international context and action directed at how lifelong learning for all can be fostered in communities as a foundation for a just human centred sustainable world The distinctive contribution of this book to the production of a local body of knowledge lies in the symbiotic relationships between these objectives so that South Africa could serve as a test case in working towards approaches that have a wider international significance

Political Economy of Post-apartheid South Africa Vusi Gumede, 2015-12-29 The book made up of three parts covers a wide spectrum of political economy issues on post apartheid South Africa Although the text is mainly descriptive to explain various areas of the political economy of post apartheid South Africa the first and the last parts provide illuminating insights on the kind of society that is emerging during the twenty one years of democracy in the country The book discusses important aspects of the political history of apartheid South Africa and the evolution of post apartheid society including an important recap of the history of southern Africa before colonialism The text is a comprehensive description of numerous political economy phenomena since South Africa gained its political independence and covers some important themes that have not been discussed in detail in other publications on post

apartheid South Africa The book also updates earlier work of the author on policy and law making land and agriculture education and training as well as on poverty and inequality in post apartheid South Africa thereby providing a wide ranging overview of the socio economic development approaches followed by the successive post apartheid administrations Interestingly three chapters focus on various aspects of the post apartheid South African economy economic policies economic empowerment and industrial development Through the lens of the notion of democratic developmental state and taking apartheid colonialism as a point of departure the book suggests that so far post apartheid South Africa has mixed socio economic progress The authors extensive experience in the South African government ensures that the book has policy relevance while it is also theoretically sound The text is useful for anyone who wants to understand the totality of the policies and legislation as well as the political economy interventions pursued since 1994 by the South African Government

Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education System Mr.Montfort Mlachila,Tlhalefang Moeletsi,2019-03-01 While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric The paper finds that money is clearly not the main issue since the South Africa s education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub Saharan African countries in per capita terms The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers history race language geographic location and socio economic status Low educational achievement contributes to low productivity growth and high levels of poverty unemployment and inequality Drawing on the literature the paper sketches some policy considerations to guide the debate on what works and what does not

Handbook of International Climate Finance Michaelowa, Axel, Sacherer, Anne-Kathrin, 2022-10-14 The concept of international climate finance channelled from developed to developing countries through public interventions for mitigation and adaptation has been developed over the last decade but its roots date back to the early 1990s Despite the high relevance of the topic in the international climate negotiations illustrated by the missed target to mobilise USD 100 billion by 2020 there is no book that provides an overview accessible to academics and practitioners alike

A Global Political Economy of Democratisation Alison J. Ayers, 2018-02-13 The late twentieth century is often portrayed as an Age of Democratisation with democracy heralded as the best of all political systems Yet democracy has multiple meanings values and significances The start of the twenty first century has witnessed a massive revival of interest in the meaning and role of democracy not least as democracy understood in one highly particular sense has been increasingly recognised to be in crisis This book presents these deliberations in a new light by moving beyond the concept of the sovereign state as the dominant framework of enquiry and by rejecting the primacy of the state and the categorical separation of the domestic and the international Instead Ayers elaborates an account of democratisation through the global political economy encompassing a trenchant critique of mainstream democracy promotion in theory and practice and opening up possibilities for different histories of democratisation autonomous of the Western liberal and neoliberal project This innovative work will prove useful to scholars and students in the fields of Politics Political Economy International Relations Development African Studies History Geography and Sociology
