preferred over complete sentences Syntactic accounts impose licensing conditions on fragments but they do not explain why fragments are sometimes dis preferred provided that their usage is licensed This book proposes an information theoretic account of fragments which predicts that the usage of fragments is constrained by a general tendency to distribute processing effort uniformly across the utterance With respect to fragments this leads to two predictions which are empirically confirmed Speakers tend towards omitting predictable words and they insert additional redundancy before unpredictable words

Tense across Languages Renate Musan,Monika Rathert,2011-10-27 This book addresses recent developments in the study of tense from a cross paradigm and cross linguistic point of view Leading international scholars explore challenging ideas about tense at the interfaces between semantics and syntax as well as syntax and morphology The book is divided into three main subsections 1 Tense in tenseless languages 2 Tense mood and modality and 3 Descriptive approaches to some tense phenomena Although time is a universal dimension of the human experience some languages encode reference to time without any grammatical tense morphology of the verb Some of these exceptional tenseless languages are investigated in this volume Kalaallisut Paraguayan Guaran and Movima Modal verbs are polyfunctional in the sense that they express both tense and modality In this volume an untypical modal is analyzed a modal analysis of imperatives is argued for and sentential mood which is closely related to modality is analyzed It is always interesting to look at the expression of tense in understudied languages which is done here for Scottish Gaelic Austronesian Rukai and German dialects The volume can be used for graduate and undergraduate level teaching
