Video Structure Meaning Brian C O'Connor, Richard L. Anderson, 2022-05-31 For over a century motion pictures have entertained us occasionally educated us and even served a few specialized fields of study Now however with the precipitous drop in prices and increase in image quality motion pictures are as widespread as paperback books and postcards once were Yet theories and practices of analysis for particular genres and analytical stances definitions concepts and tools that span platforms have been wanting Therefore we developed a suite of tools to enable close structural analysis of the time varying signal set of a movie We take an information theoretic approach message is a signal set generated coded under various antecedents sent over some channel decoded under some other set of antecedents Cultural technical and personal antecedents might favor certain message making systems over others The same holds true at the recipient end yet the signal set remains the signal set In order to discover how movies work their structure and meaning we honed ways to provide pixel level analysis forms of clustering and precise descriptions of what parts of a signal influence viewer behavior We assert that analysis of the signal set across the evolution of film from Edison to Hollywood to Brakhage to cats on social media yields a common ontology with instantiations responses to changes in coding and decoding antecedents

News and Democratic Citizens in the Mobile Era Johanna Dunaway, Kathleen Searles, 2023 Though people frequently use mobile technologies for news consumption evidence from several fields shows that smaller screens and slower connection speeds pose major limitations for meaningful reading In News and Democratic Citizens in the Mobile Era Johanna Dunaway and Kathleen Searles demonstrate the effects of mobile devices on news attention engagement and recall and identify a key cognitive mechanism underlying these effects cognitive effort They advance a theory that is both old and new the costs of information seeking curb participatory behaviors unless the benefits outweigh them For news

consumers in the mobile era for example mobile devices increase the time economic and cognitive costs associated with information seeking Only for a small few do the benefits of attending to the news on mobile devices outweigh the costs Building on economic theories of news media choice and the ways audience demand shapes news craft and production Dunaway and Searles argue that attention engagement and recall suffer when people consume news on mobile devices They then investigate the implications of these effects for the news industry and for an informed democratic citizenry Drawing on both laboratory and real world studies Dunaway and Searles bring the psychophysiology of news consumption to bear on the question of what we could lose in an information environment characterized by a dramatic shift in reliance on mobile devices
