My Max Score AP World History Kirby Whitehead, 2012-02 The only study guide to offer expert customized study plans for every student's needs You've had a year to study but also a year to forget As the AP test approaches other guides reexamine the entire year of material But only one guide identifies your strengths and weaknesses then points you directly to the review you need most My Max Score a new concept developed by AP teachers and exam graders offers separate review materials for long term prep and last minute cram sessions no matter when you start studying This is just what you need plus strategies sample essays and full length practice tests to bring out your best on test day *World Yearbook of Education 2011* Lyn Yates, Madeleine Grumet, 2011-02-01 How do curriculum conceptions of knowledge and the schooling experiences of young people engage the great issues of this tumultuous time Curriculum is always influenced by the events that shape our world but when testing and benchmarking preoccupy us we can forget the world that is both the foundation and the object of curriculum This edited volume brings together international contributors to analyze and reflect on the way the events of the last decade have influenced the curriculum in their countries As they address nationalism in the face of economic globalisation the international financial crisis immigration and the culture of diaspora they ask how national loyalties are balanced with international relationships and interests They ask how the rights of women and of ethnic and racial groups are represented They ask what has changed about history and civics post 9 11 and they ask how countries that have experienced profound political and economic changes have addressed them in curriculum These interactions and changes are a subject of particular interest for an international yearbook in that they are almost always permeated by global movements and influenced by multinational bodies and practices And as these essays show in curriculum global and international issues are explicitly or implicitly also about local and national interests and about how citizens engage their rights and responsibilities This volume brings together a new approach to perspectives on curriculum today and a new collection of insights into the changes from different parts of the world which discuss How is the world represented in curriculum How do responses to world events shape the stories we tell students about who they are and can be This book will be of great benefit to educational researchers and policy makers as well as undergraduate and postgraduate students **Educating Democratic Citizens in Troubled Times** Janet S. Bixby, Judith L. Pace, 2014-03-14 This book offers a groundbreaking examination of citizenship education programs that serve contemporary youth in schools and communities across the United States These programs include social studies classes and curricula school governance and community based education efforts The book takes an interdisciplinary approach to exploring the experiences and perspectives of educators and youth involved in these civic education efforts The contributors offer rich analyses of how mainstream and alternative programs are envisioned and enacted and the most important factors that shape them A variety of theoretical lenses and qualitative methodologies are used including ethnography focus group interviews and content analyses of textbooks *The New Politics of the Textbook*

Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and disability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production

Understanding Development Economics Adam Fforde, 2014-01-03 Important parts of development practice especially in key institutions such as the World Bank are dominated by economists In contrast Development Studies is largely based upon multidisciplinary work in which anthropologists human geographers sociologists and others play important roles Hence a tension has arisen between the claims made by Development Economics to be a scientific measurable discipline prone to wide usage of mathematical modelling and the more discursive practice based approach favoured by Development Studies The aim of this book is to show how the two disciplines have interacted as well as how they differ This is crucial in forming an understanding of development work and to thinking about why policy recommendations can often lead to severe and continuing problems in developing countries This book introduces Development Economics to those coming from two different but linked perspectives economists and students of development who are not economists In both explaining and critiquing Development Economics the book is able to suggest the implications of these findings for Development Studies and more broadly for development policy and its outcomes Brief Review

Tobin,Dennis R. Ybarra,2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all
