

How to connect a car amp to a smartphone or other audio source in your home

SoundCertified

If not connecting a car amp used in your home to a home stereo, you can use a wide range of audio sources. Here are several examples that make it simple while giving great sound quality.

Example 1

Smartphone/tablet with a headphone jack (3.5mm jack) or USB-headphone jack adapter

You can use any smartphone, tablet, or laptop with a headphone jack to connect to a car amp by using a 3.5mm ($\frac{1}{8}$ ") headphone to RCA adapter cable. Note that the volume can vary a lot between devices so you'll need to adjust the amp gain and device volume for good sound.

NOTE: Some newer smartphones don't offer a headphone jack. You'll need the device-specific USB to headphone jack adapter that works with your phone.

Remote wire jumpered to the +12V terminal

Example 2

Connecting a car amp to a home Bluetooth receiver

SMARTPHONE/
TABLET

For an even more convenient connection, you can use a home Bluetooth receiver with a 3.5mm line out jack. Connect to the car amp's RCA inputs using a headphone plug to RCA adapter cable.

Typical connections
