**Additions to a Revision of the Shark Genus Carcharhinus** J. A. F. Garrick,1985 Features of the valid nominal species of Aprionodon Gill isodon Valenciennes and Hypoprion M ller and Henle hemiodon Valenciennes macloiti M ller and Henle and signatus Poey plus those of a previously unrecognized species here described as Carcharhinus leiodon n sp are examined and compared with those of Carcharhinus Blainville Features studied include morphometrics vertebral numbers and other vertebral characteristics tooth numbers color pattern and some other aspects of external morphology It is concluded that on these features C Leiodon n sp is entirely encompassed within the parameters of Carcharhinus and that although A isodon H hemiodon H macloiti and H signatus each extend the range of diversity of Carcharhinus in one or more features A isodon is not uniquely different from Carcharhinus and there is no common pattern of difference between the three species of Hypoprion and Carcharhinus Accordingly and because the nature of the teeth of Aprionodon and Hypoprion has been found insufficient to warrant generic distinction from Carcharhinus the genera Aprionodon and Hypoprion are synonymised with Carcharhinus A diagnosis and description are given for each of the above species The descriptions include measurements counts and line illustrations that show the whole shark in lateral view underside of head nostril and teeth The geographic distribution is summarized as are also the meager biological data available on number of embryos size at birth size at sexual maturity and maximum size

NOAA Technical Report NMFS. ,1984

**Marine Flora and Fauna of the Northeastern**

**United States** D. Keith Serafy, 1985 The echinoid fauna from littoral to abyssal depths off the northeastern United States Cape Hatteras NC to northern Nova Scotia comprises 31 species in 26 genera and 19 families An introduction to the external morphology distribution and natural history is given along with an illustrated key to the species an annotated systematic list and an index The fauna includes 17 species with wide ranging distributions on continental slopes or abyssal plains The remaining 14 species occur in shallower waters on the continental shelf or upper slope Of these eight are tropical in distribution with their northern range extending to the northeastern United States and three are mainly boreal with the northeastern United States at the southern limit of their range Two species occur only off the eastern United States and one species is cosmopolitan

**Acute Nursing Care** Ian Peate, Helen Dutton, 2014-08-01 Delays in recognising deterioration or inappropriate management of people in acute care settings can result in late treatment avoidable admissions to intensive care units and in some instances unnecessary deaths As the role of the nurse in healthcare settings continues to change and evolve today's student nurses need to be equipped with the fundamental skills to recognise and manage deterioration in the patient in a competent and confident manner as you learn to become practitioners of the future Using a body systems approach and emphasising the central role and function of the nurse throughout this book provides a comprehensive overview of the essential issues in this important subject Topics covered include recognition and identification of physiological deterioration in adults identification of disordered physiology that may lead to a medical emergency linked to deterioration of normal function relevant anatomy and physiology pathophysiological changes and actions that need to be taken immediate recognition and response investigations diagnosis and management issues and teaching and preventative strategies

Acute and Emergency Care in Athletic Training Michelle A. Cleary, Katie Walsh Flanagan, 2019-03 Acute and Emergency Care in Athletic Training is an invaluable text for students in athletic training programs It provides them with the necessary information to examine treat and manage common acute injuries and illnesses
