Smart Materials and Manufacturing Technologies for Sustainable Development Vijeesh Vijayan,Rashmi P. Shetty,Srinivasa P. Pai,2024-10-24 This book offers a comprehensive exploration of Smart Materials and Manufacturing Technologies for Sustainable Development delves into the dynamic intersection of innovative materials intelligent manufacturing and sustainable practices presenting a vital resource for researchers engineers and professionals seeking to shape a greener and more advanced future Covering a wide range of topics the book delves into the latest advancements in materials processing with a particular focus on cutting edge technologies such as advanced manufacturing nanotechnology and materials The book addresses the pressing need for sustainable manufacturing practices unveiling eco friendly approaches that reduce environmental impact without compromising performance Chapters dedicated to artificial intelligence and machine learning illuminate how these game changing technologies facilitate manufacturing materials characterization and process optimization By integrating IoT Industry 4 0 robotics and automation this book highlights the growing synergy between intelligent manufacturing and sustainable materials paving the way for increased efficiency and productivity It examines the importance of advanced materials characterization techniques empowering researchers to gain deeper insights into materials properties behaviour and potential applications With its multidisciplinary approach this book appeals to a diverse audience including materials scientists manufacturing engineers environmentalists policymakers and students eager to contribute to a more sustainable and technologically advanced society **Experimental**

**Characterization of Spin Motor Nozzle Flow** Carl W. Peterson,John F. Henfling,Rocky J. Erven,2006 The Mach number in the inviscid core of the flow exiting scarfed supersonic nozzles was measured using pitot probes Nozzle characterization experiments were conducted in a modified section of an obsolete M 7 3 test section nozzle assembly on Sandia s Hypersonic Wind Tunnel By capitalizing on existing hardware the cost and time required for tunnel modifications were significantly reduced Repeatability of pitot pressure measurements was excellent and instrumentation errors were reduced by optimizing

the pressure range of the transducers used for each test run Bias errors in probe position prevented us from performing a successful in situ calibration of probe angle effects using pitot probes placed at an angle to the nozzle centerline Page 3

*Sequential Intelligent Dynamic System Modeling and Control* Hai-Jun Rong,Zhao-Xu Yang,2024-07-05 The book offers novel research results of sequential intelligent dynamic system modeling and control in a unified framework from theory proposals to real applications It covers an in depth study of various learning algorithms for the permanent adaptation of intelligent model parameters as well as of structural parts of the model The comprehensive researches on sequential fuzzy and neural controller design schemes for some complex real applications are included This is particularly suited for readers who are interested to learn practical solutions for controlling nonlinear systems that are uncertain and varied at any time In addition the organization of the book from addressing fundamental concepts and presenting novel intelligent models to solving real applications is one of the major features of the book which makes it a valuable resource for both beginners and researchers wanting to further their understanding and study about realtime online intelligent modeling and control of nonlinear dynamic systems The book can benefit researchers engineers and graduate students in the fields of control engineering artificial intelligence computational intelligence intelligent control nonlinear system modeling and control etc
