**Cultural Encounters with the Environment** Viola Haarmann, 2000

In *Cultural Encounters with the Environment* a distinguished group of contributors offers a fresh and original view of contemporary geography. The authors explore the role of four traditional themes in the New cultural geography: the interplay between the evolution of particular biophysical niches and the activities of the culture groups that inhabit them; the diffusion of cultural traits; the establishment and definition of culture areas; and the distinctive mix of geographical characteristics that gives places their special character in relation to one another. By examining how cultural space is constructed, how environment is remade, understood and imaged as a consequence, and how people lay claim to place, this volume establishes a compelling case for the importance of these enduring concepts to present and future trajectories in cultural geography.

**International Encyclopedia of Human Geography**, 2019-11-29 International Encyclopedia of Human Geography Second Edition Fourteen Volume Set embraces diversity by design and captures the ways in which humans share places and view differences based on gender, race, nationality, location, and other factors. In other words, the things that make people and places different. Questions of, for example, politics, economics, race relations, and migration are introduced and discussed through a geographical lens. This updated edition will assist readers in their research by providing factual information, historical perspectives, theoretical approaches, reviews of literature, and provocative topical discussions that will stimulate creative thinking. Presents the most up-to-date and comprehensive coverage on the topic of human geography. Contains extensive scope and depth of coverage. Emphasizes how geographers interact with, understand, and contribute to problem solving in the contemporary world. Places an emphasis on how geography is relevant in a social and interdisciplinary context.

Encyclopedia of Human Geography Barney Warf, 2006-05-16 Human geography in the last decade has undergone a conceptual and methodological renaissance that transformed it into one of the most dynamic and innovative of the social sciences. Long a borrower of ideas from other disciplines, geography has become a contributor in its own right, and a spatial turn is evident in disciplines as diverse as Sociology, Anthropology, and Literary Criticism. With more than 300 entries written by an international team of leading authorities in the field, the *Encyclopedia of Human Geography* offers a comprehensive overview of the major ideas, concepts, terms, and approaches that characterize a notoriously diverse field. This multidisciplinary volume provides cross-cultural coverage of human geography as it is understood in the contemporary world and takes into account the enormous conceptual changes that have evolved since the 1970s, including a variety of social constructivist approaches. Key Features: Examines a range of themes characterizing different schools of thought and addresses long-standing topics such as urban, economic, and medical geography, as well as contemporary topics including feminism, the social dimensions of GIS, and the social construction of nature. Explores many of the dualities that long characterized social science: nature versus society, the individual versus the social, the historical versus the geographical, consumption versus production, and breaks them down using postmodern and poststructuralist approaches. Illustrates how

social and spatial structures draw upon people's daily lives which in turn structures their actions. Looks at how globalization has manifested differently from place to place by discussing topics such as transnational capital, international trade, global commodity chains, global cities, international financial and telecommunications systems, and how the global economy is reshaping geopolitics and governance.

**Key Themes:** Cartography, Geographical Information Systems, Economic Geography, Geographic Theory and History, Political Geography, Social Cultural Geography, Urban Geography.

**Encountering Ideas of Place in Education** Emma Rawlings Smith, Susan Pike, 2023-12-01. This book draws together theories, research, and practice on knowledges and pedagogies of place across educational settings. Using empirical research on learning across education systems, each chapter highlights different concepts of place in various contexts such as environments, understandings of place like those experienced by communities, and opportunities for embedding place in learning. Chapters are co-constructed by authors working collaboratively across different contexts, tackling key themes such as justice, mobilities, changes, and sustainability through place. The book indicates how educators can apply creative approaches to teaching within and about place in education and will therefore be of relevance to a wider range of academics, teachers, and practitioners working in early years settings, schools, universities, and other educational contexts.

*The Routledge Handbook of Methodologies in Human Geography* Sarah A. Lovell, Stephanie E. Coen, Mark W. Rosenberg, 2022-10-18. The Routledge Handbook of Methodologies in Human Geography is the defining reference for academics and postgraduate students seeking an advanced understanding of the debates, methodological developments, and methods transforming research in human geography. Divided into three sections: Part I reviews how the methods of contemporary human geography reflect the changing intellectual history of human geography and events both within human geography and society in general. In Part II, authors critically appraise key methodological and theoretical challenges and opportunities that are shaping contemporary research in various parts of human geography. Contemporary directions within the discipline are elaborated on by established and emerging researchers who are leading ontological debates and the adoption of innovative methods in geographic research. In Part III, authors explore cross-cutting methodological challenges and prompt questions about the values and goals underpinning geographical research work such as: Who are we engaging in our research? Who is our research for? What are our relationships with communities? Contributors emphasize examples from their research and the research of others to reflect the fluid, emotional, and pragmatic realities of research. This handbook captures key methodological developments and disciplinary influences emerging from the various sub-disciplines of human geography.
