Peterson, 2020-10-19 In *Works Righteousness* Anna L Peterson examines the place of practice in contemporary ethical theory Peterson argues that rather than assuming that pre established moral ideas guide action ethicists should acknowledge and explore the relationship between ideas actions and results Both an analysis of alternative models in which practice plays a stronger role and an argument for taking practice more seriously in broad questions of ethics as well as in concrete case studies *Works Righteousness* contends that what we do generates and alters our values just as often as expressed values motivate or guide the ways we act Peterson here challenges prevailing philosophical and religious theories that ideas are what truly matter underlining the value of attention to people s concrete experiences and highlighting the relevance of theoretical insights to contemporary social issues such as climate change euthanasia and hate speech Through examinations of pragmatism Marxism and religious pacifism all of which significantly highlight a practice focused approach *Works Righteousness* addresses the way social structures condition moral ideas and actions the dangers of thinking about moral problems as polarized dilemmas and the complex mutual shaping of ideas and actions      Environmental Philosophy Hugh P. McDonald, 2014-05-10 *Environmental Philosophy A Revaluation of Cosmopolitan Ethics from an Ecocentric Standpoint* calls for a new approach to ethics Starting from the necessity for all life of air water and food the book revalues the relation of ethics and environmentalism Using insights of the environmental ethicists environmental ethics becomes the model for ethics as a whole Humans are part of a larger environment Cosmopolitanism should be revised in accord with environmental ethics The book applies a new theory of values to the relation of value and obligation and of duty rights and virtue to accord with ecocentrism The book also critically evaluates Utilitarianism and the self interest theory Other chapters address population species preservation and a practical program for environmental policy
