BRICS and Emerging Economies PB Anand, Shailaja Fennell, Flavio Comim, 2020-12-16 Ever since Jim O Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with

summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes Are geo political tensions rising between these nations During the post COVID 19 situation the importance of bilateral and multilateral co operation mechanisms and institutions is becoming clear This book focuses on one such emerging co operation mechanism of BRICS but also more widely on those five countries and other similar economies As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals Situated Practices of Strategic Planning

A Nordic overview Moa Tunström,Shinan Wang,2019-03-28 Issues related to segregation and integration are major responsibilities and challenges for cities and a segregated urban environment can be understood as a symptom of wider social injustices In this brief overview of current research on residential segregation the focus is on structural reasons to segregation This means that it is planning policies and tendencies in socio economic development that are discussed rather than specific social integration measures and projects But there is an obvious arena where these two approaches to segregation meet and that is in the local community and its spaces for social interaction This is important to keep in mind that the integrated city is both a result of strategies and initiatives on a micro scale in the neighbourhood and between individuals and initiatives and development on a macro scale This report is part of a theme on segregation within the Nordic
