Gcse Exam Boards Uk:

The administration of examinations for 15-19 year olds in England Great Britain: Parliament: House of Commons: Education Committee, 2012-07-03 This report from the Education Committee looks at the administration of examinations for 15-19 year olds in England. The Committee expresses serious concerns about incentives in the exam system and about competition on syllabus content. Incentives in the system should be changed so the downward pressure through the competition of exam boards is mitigated. The Committee considers a number of options to change incentives including i) A single board. This offers a simpler system with no risk of competition but the Committee believes the cost risk and disruption outweigh the benefits ii) Franchising of subjects to exam boards. This removes syllabus competition but again has downsides. 3 Or the current system of multiple boards. The Committee sees no benefit in competition on syllabus content but the setting and marking of exams and associated administration if properly regulated could generate incentives and drive quality up offering value for money to schools and colleges. The Committee also recommends the development of national syllabuses accredited by Ofqual. The syllabuses would be developed by exam boards in conjunction with learned bodies and employer organisations and could therefore retain the benefits of competition on quality and the incentive for exam boards to innovate.

Do It Yourself: GCSEs and A-Levels by Distance Learning Matthew J. Kraus, 2018-03-12 Most of us understand the benefits of getting a good education. Not only can it open doors to university and better job prospects but can help to broaden an individual's outlook on life. For some people however getting the right qualifications can be a real challenge especially if they aren't in mainstream education. It's no wonder then that an increasing number of people are turning to distance learning or home education as their preferred way of passing exams. This book focuses on GCSEs and A Levels the main school leaving qualifications that are universally recognised in the UK. It explains the main features of the qualifications how to study them and how to take the exams involved. This book is intended to be used as a guide for prospective students who might want to undertake this form of learning but have some difficulty in working out where to start. Engaging Students with Music Education Pete Dale, 2017-03-27 Engaging Students with Music Education is a groundbreaking book about using DJ decks and urban music in mainstream schools to re-engage disaffected learners and develop a curriculum which better reflects overall contemporary tastes. Many young learners are at risk of exclusion this book argues that for such individuals the implications of such a shift in the music curriculum could be especially positive. Drawing extensively on the author's own wealth of teaching experience and bridging the gap between practice and theory this book demonstrates through case studies that DJ decks can prove extremely valuable in mainstream classroom situations across the secondary school age ranges. Addressing challenging and crucial topics combining rigorous theoretical analysis with practical suggestions the book addresses questions such as Are DJ decks actually a musical instrument and are they suitable for classroom teaching? Will Ofsted's school inspectors approve of music teaching involving DJ decks and urban music? If we bring urban music into the

classroom will this further marginalise classical music Are DJing and MCing skills recognised within examination specifications at least in the UK Current teachers will find the practical advice on how to incorporate DJ decks and urban music into their classroom especially helpful whilst educational researchers will be captivated by the critical discussion of the child centred tradition and a theoretical approach which stretches from continental philosophy to practice based reflection With an insistence that the starting point for music education should always be the interests and experiences of the learners this book is essential reading for those music teachers and researchers interested in the benefits of non standard music making in the classroom
