

IELTS Band 8 Sample Essay

Exam Question: Even though Globalization affects the world's economics in a very positive way, its negative sides should not be forgotten. Discuss.

Everything has two sides in the world, and so has the process of globalization too. The effects of globalization on the world economy are diverted.

We must acknowledge that the negative effects are from a different kind than the positive ones. Therefore the negative sides, like low payment in less developed countries are important to considerate.

If we take the Eurozone for example, the economic changes according to the globalization process are huge. Many companies have transferred their factories into cheaper production areas to compete in the world markets. The results are rising unemployment rates in the "old industrial countries".

In regard to the other countries on the world market, such as China, this job transfer is a big opportunity. But no one can deny that the consequences for the less developed countries where economy flourished, based on availability of cheap employees are highly important: globalization based on this fact brings environmental problems.

Nevertheless, there are also positive reasons for globalization effects. In general it is remarkable that there is a new tendency in "Thinking Global". For instance, people are willing to learn more languages and get educated about other cultures. Countries formally known as undeveloped, such as India, are getting chances to be the main leader in a certain field.

All in all it can be said that the effects of globalization are enormous. The understanding of economic processes has changed completely. It is important to think in bigger terms, not just about the own country. The positive things that this globalization process have brought must sensitize us for the negative sides. The all over aim should be a world in balance, but this has yet to come.
