Push Factors and Capital Flows to Emerging Markets Mr. Eugenio Cerutti, Mr. Stijn Claessens, Mr. Damien Puy, 2015-06-22 This paper analyzes the behavior of gross capital inflows across 34 emerging markets EMs We first confirm that aggregate inflows to EMs co move considerably We then report three findings i the aggregate co movement conceals significant heterogeneity across asset types as only bank related and portfolio bond and equity inflows do co move ii while global push factors in advanced economies mostly explain the common dynamics their relative importance varies by type of flow and iii the sensitivity to common dynamics varies significantly across borrower countries with market structure characteristics especially the composition of the foreign investor base and the level of liquidity rather than borrower country's institutional fundamentals strongly affecting sensitivities Countries relying more on international funds and global banks are found to be

more sensitive to push factors Our findings suggest that EMs need to closely monitor their lenders and investors to assess their inflow exposures to global push factors
