

Geography Revision

Unit 1 – Weather and Climate

The Climate within the UK

There are FIVE main reasons for the changing/fluctuating temperature in the UK. You will need to memorise each of them by heart!

Pressure Systems (from the west)

- Low pressure from the west makes a lot of rainfall as the air is rising and the water vapour is condensing.
- The is opposite for high pressure

Altitude (how high the land is)

- The higher the altitude, the colder the temperature as the air is thinner.
- The higher the altitude, the wetter it is as the vapour condenses.

Prevailing Wind

- The UK's most common prevailing wind is from the south west.
- It brings moist, warm air, making the UK wet and warm.
- The West gets more heat and rain than the east.

Latitude (how far north or south of the equator something is, the further north you go, the colder it is)

- The sun is at a lower angle in the sky so its heat energy is spread over more of the earth's

Distance from the sea

- Areas nearer the sea are warmer in winter because the sea shores keep them warm.
- Areas near the sea are cooler in summer because the sea takes a long time to heat up.
- The West gets more warmed up than the East

Depressions

Okay, the depressing part of the GCSE is the "depressions".

- 1) They form in the Atlantic Ocean, then move east over the UK.
- 2) The warm air is less dense so it rises above the cold air
- 3) Condensation occurs as the warm air rises causing rain clouds to develop
- 4) Rising air also causes low pressure at the Earth's surface
- 5) So winds blow into the depression in a spiral (High to low pressure)
- 6) A warm front is the front edge of the moving warm air.
- 7) A cold front is the front edge of the moving cold air.

Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Grade 1climatology Summaries full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Grade 1climatology Summaries eBooks, including some popular titles.

FAQs About Grade 1climatology Summaries Books

What is a Grade 1climatology Summaries PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to

view or print it. **How do I create a Grade 1climatology Summaries PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF.

How do I edit a Grade 1climatology Summaries PDF? Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Grade 1climatology Summaries PDF to another file format?**

There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Grade**

1climatology Summaries PDF? Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
