*Ford Falcon - Commemorative Edition* Luke West, 2022-05-09 Ford Falcon Commemorative Edition celebrates the much loved car's six decade rule of Aussie roads and racetracks. With the chequered flag flying on the Blue Oval favourite this book examines the first Falcons to take flight in the early 1960s through to the final FG X. Special emphasis is placed on the glorious decade 1969-78 and the magnificent high performance machines from the Falcon XW GT HO to the XA XB and the Cobra. These are cars that still command instant respect and ooze all the excitement, emotion, colour, freedom and raw power of their time. Ford Falcon captures the stories from the men who designed, developed, built and raced these bred for Bathurst beasts. It features stunning photography of Falcon's triumphs, milestones and majesty. After some 56 years and 3.8 million cars, what better way to say goodbye to Aussie motoring royalty?

*Free to Make* Dale Dougherty, 2016-09-27 A fascinating study of the global Maker Movement that explores how making impacts our personal and social development, perfect for enthusiastic DIYers. Dale Dougherty, creator of MAKE magazine and the Maker Faire, provides a guided tour of the international phenomenon known as the Maker Movement, a social revolution that is changing what gets made, how it's made, where it's made, and who makes it. *Free to Make* is a call to join what Dougherty calls the renaissance of making, an invitation to see ourselves as creators and shapers of the world around us. As the internet thrives and world-changing technologies like 3D printers and tiny microcontrollers become increasingly affordable, people around the world are moving away from the passivity of one-size-fits-all consumption and command-and-control models of education and business. *Free to Make* explores how making revives abandoned and neglected urban areas, reinvigorates community spaces like libraries and museums, and even impacts our personal and social development, fostering a mindset that is engaged, playful, and resourceful. *Free to Make* asks us to imagine a world where making is an everyday occurrence in our schools, workplaces, and local communities, grounding us in the physical world and empowering us to solve the challenges we face.

**Blackwell's Five-Minute Veterinary Consult Clinical Companion** Elisa M. Mazzaferro, 2011-06-20 Blackwell's Five Minute Veterinary Consult Clinical Companion Small Animal Emergency and Critical Care is a condensed handbook with concise bullet points and alphabetically organized topics. Using the popular Five Minute Veterinary Consult format, the book provides rapid access to up-to-date information in the fast-paced emergency room or critical care environment. With more than sixty-five expert chapter authors, the book offers reliable information to help promote quick decision making in diagnosing and treating emergency conditions. This clinical companion serves as an ideal purchase for general veterinary practitioners and students, veterinary technicians, and hospital and emergency clinic staff.

**Proxistant Vision** Synne Tollerud Bull, Dragan Miletic, 2025-06-24 How the surge in aerial technologies such as drones

and satellites influences visual culture beyond the screen The smooth flight from aerial overview to intimate close up in Martin Scorsese s Hugo 2011 exemplifies the concept of proxistant vision a combination of proximity and distance close up and overview detail and the big picture in a unified visual form In Proxistant Vision Synne Bull and Dragan Miletic develop the concept of proxistant vision and trace its emergence as a visual paradigm of the twenty first century As exemplified by Google Earth s digital swipe between globe perspective and street level detail proxistant vision currently proliferates across digital geography computer games architectural models data visualizations and CGI cinema It is defined as the combination of proximity and distance in a single image across a dynamic flight or zoom Pointing to the surge in aerial imaging and remote sensing technologies such as drones and satellites the book moves beyond the screen to include the kinetic architecture of rides and urban observation wheels The key objective of this study is threefold to trace the genealogy and understand the technical operation of proxistance as it traveled from periphery to center in the twenty first century to explore its alternative potentialities in contemporary art practices and finally to reflect critically on the worldviews underpinning different modalities of proxistance in times of environmental crisis The authors show how the powerful effect of combining proximity and distance which was already in place with the earliest cartographic inscriptions has taken precedence on and beyond our screens today
