**Strabo's Geography** Strabo,2024-06-11 Written in the first century AD Strabo s Geographica tells us just about everything one could know about the ancient world of his day We find instructions on how to tame elephants information on the production of asphalt how saffron is collected the treatment of the aged the practice of yoga the lineage of obscure eastern dynasties religious festivals prostitution volcanic activity to name but a few of the topics his great work expounds upon From his home in what is now Turkey Strabo travelled around the Mediterranean describing the locations he visited and those he passed through Some of the information in his great work is derived from his own travels but most of it is the product of his reading and research So it is not merely a travelogue or guidebook but rather an intellectual journey through ancient places and the literature of antiquity which implicitly asks Who are we and Where do we come from His answer involves a detailed description of the first century world he thought his readers should know In this new modern translation of the complete work translator Sarah Potheary renders Strabo s Geographica as an invaluable resource for anyone interested in how the world today came into being The main obstacle for readers has always been how to approach what at first sight is a daunting work of 300 000 words Even when translated from ancient Greek into English Strabo s narrative has come across as sprawling and difficult to navigate Ancient names for modern places used by Strabo sound naturally unfamiliar to contemporary readers making it seem as if the world he describes is remote from our own in terms of place as well as time Potheary s translation addresses these problems by orientating the reader within the twenty first century world As she progresses through the narrative the reader will be able to locate where he is in the modern world as well as in the ancient world By doing so this book mimics what Strabo was doing two thousand years ago relating the rapidly changing present of his readers to their own ancient past The questions of identity and origin that underlie his work are as relevant today as two thousand years ago It is time Potheary argues the modern world got to know Strabo better
