

HOW DO I KNOW IF MY CLUTCH IS FAILING?

THE BIGGEST SIGNS YOUR CLUTCH IS FAILING

Your car's clutch enables you to smoothly change gear. Replacing a worn clutch can save you thousands in a failing engine. So it's vital to have your car's clutch checked regularly. Here are the biggest signs your clutch is going.

CLUTCH SLIPPING

A slipping clutch is one of the most common signs of a failing clutch. It occurs when the clutch plate is worn and can't grip the engine's flywheel properly. This causes the engine to rev without the car moving forward. A slipping clutch can also cause the car to vibrate or shake when you press the clutch pedal.

CLUTCH STICKING

A sticking clutch is another common sign of a failing clutch. It occurs when the clutch pedal is stuck in the down position and can't be pressed back up. This can be caused by a worn clutch cable or a problem with the clutch master cylinder.

A BURNING SMELL

When a clutch is failing, it can cause a burning smell. This is usually caused by the clutch plate rubbing against the flywheel, which creates heat and smoke. A burning smell is a serious sign that your clutch needs to be replaced.

DIFFICULTY CHANGING GEARS

Changing gears should be a smooth and seamless process. If you're having trouble shifting, it could be a sign of a failing clutch. This is often caused by a worn clutch cable or a problem with the clutch master cylinder.

HIGHER BITING POINT

A higher biting point is another sign of a failing clutch. This occurs when the clutch plate is worn and can't grip the flywheel properly. As a result, the car will move forward at a higher speed than it should when you press the clutch pedal.

HOW LONG DOES A CLUTCH LAST?

Most clutches are designed to last around 60,000 miles before needing to be replaced. However, this can vary depending on how you drive and the quality of the clutch components. If you're driving on busy roads or highways, your clutch may wear out much faster.

There are a few things you can do to make your clutch last longer. First, avoid riding the clutch pedal when you're driving. Second, don't rev the engine too high when you're in gear. Finally, make sure you're using the correct driving technique for your car.
