Video provides a powerful way to help you prove your point. When you click Online Video, you can paste the URL of the video you want to use. You can also type a keyword to search for the video to use. If you find a video you want to use, click the video to insert it into your document. To make a video stand out, you can apply a video style. Word provides several video styles, including text boxes, shadows, and colors. For example, you can add a video to a document, then click Insert and choose the elements you want from the different galleries.

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply a theme, you can change the colors to match the new theme.

Save as Word with a button that show up where you need them. To change the way a picture fits into a document, click and a button for layout options appears next to it. When you work on a table, click the plus sign to add a row or a column, and then click the plus sign.

Reading is easier, too, in the new reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.
