

## Threading for twin needle

1. Insert a twin needle. See page 16 "Changing the needle".
2. Use a second thread spool or wind a bobbin with the thread you are going to use as the second upper thread.
3. Left needle (blue). Thread the machine as explained on page 9 (Vertical spool pin) and check to ensure that thread lies between the **inner** thread tension discs, **inside** the last thread guide. Thread left needle.
4. Right needle (red). Pull up the extra spool pin.
5. Place a spool holder and a felt pad under the bobbin with the second thread on the spool pin.
6. Thread the machine as before but this thread should lie between the **outer** thread tension discs, **outside** the last thread guide. Thread right needle.

## Bobbin winding with the machine threaded

Make sure that the presser foot and the needle are in the up position. Use only the original Husqvarna Viking green bobbins with your Designer I.

**Only use a metal presser foot when bobbin winding from the needle.**

1. Place your empty bobbin with the small mark (B) out on the bobbin spindle on the front of the machine. Bring the bobbin spindle down. A Pop-up menu on the Color Touch Screen reminds you that bobbin winding is engaged.
2. Pull the thread from the needle under the presser foot and to the right under the thread guide (c) and over (d).
3. Start from above and wind a few turns of thread clockwise around the bobbin. Cut off the thread on the thread cutter (e).
4. Press the foot control or touch (B). When the bobbin is filled, the winding will stop automatically. Remove the bobbin, cut off the thread (e) and bring the bobbin spindle up.

**Notes:** We do not recommend winding specialty threads such as invisible or other stretchy threads through the needle. Instead see "Bobbin winding – vertical spool pin".

thank you for being an important part of keeping this knowledge alive and relevant      **Gunsmithing** Roy F. Dunlap,2012  
2012 Reprint of 1950 Edition Full facsimile of the original edition not reproduced with Optical Recognition Software  
Illustrated with over 100 photos and drawings Roy F Dunlap s book is self described as a manual of firearms design  
construction alteration and remodeling for amateur and professional gunsmiths and users of modern firearms What makes  
Dunlap s book important is its specificity For example instead of merely bringing up the need for a bench grinder he cites  
why a 1 4 o r 1 3 horsepower double shaft model turning at 1 750 rpm with a wire brush wheel on one side and a medium  
coarse wheel on the other is the best choice He supports his recommendation by explaining why you ll find wider use for a  
medium coarse than a finer stone His chapter entitled Helpful Gunsmith Knowledge is absolutely crammed with bits of  
information and includes tips that he evidently could find no other place for in his book In the midst of a general discussion  
on disassembly for instance Dunlap digresses to describe in detail a L shaped tool he made to simplify reassembly of an L C  
Smith double and how to use it All in all Dunlap covers soldering and brazing welding heat treatment of metals making and  
fitting sights and accessories making fitting and heat treatment of parts cartridge information useful to gunsmiths rifle
