

Lift Link Proximity Sensor (W50Z)

The lift link proximity sensor is located near the bottom of the control panel. This sensor detects the lift linkage position when the forks reach maximum lift height and stops the lift pump motor. In the event that the lift pump motor continues to run after the forks reach maximum height, check the lift link proximity switch for proper function and adjustment. See Figure 18.

CHECK

1. Remove the electrical compartment covers. Turn the key switch to the **ON** position and move the control handle arm to the **RUN** position. Check the battery discharge indicator for proper battery charge.
2. Completely lower the forks then press and hold the lift button. The lift pump and motor assembly should activate, raise the forks to their maximum lift height, and turn off while the lift button is still depressed.
 - a. If the lift pump and motor activates but does not raise the forks, the problem may be in the hydraulic or lift linkage systems.

- b. If the lift pump and motor does not activate, troubleshoot the electrical system.
- c. If the forks raise properly but the lift pump and motor does not shut off when the forks reach maximum lift height, unplug and clean the proximity sensor connector. Reconnect the sensor with the wiring harness and check operation again. If the problem remains, proceed to the next step.

CAUTION

Keep hands and fingers clear of lift linkage to avoid injury from pinch points.

3. Cover the face of the proximity switch with a piece of metal then press and release the lift button.
 - a. If the lift pump and motor shut down when the sensor is covered, properly adjust the lift linkage proximity sensor. See **Adjust**.
 - b. If the lift pump and motor assembly continues to operate when covered, test the lift linkage proximity switch. See **Test**.

REPAIR

The following repairs are performed with the key switch in the **OFF** position and the electrical compartment cover removed unless otherwise noted. Replace the cover when repairs are complete.

Remove

1. Disconnect the sensor wiring connector from the truck wiring harness.
2. Remove the front jam nut from the position sensor threads. See Figure 19.
