Is Reform on Immigration somewhere in the near Future? Research Paper What is the first thing that comes to mind when one might think of Immigration? Possibly what is the United States current Immigration Policy? Would you even think that it is considered to be one of the most debatable topics constantly? There are two sides to every debate; I have been assigned to the pro side for immigration stating that I feel that there should be limits placed on immigration to our country and also more regulation of illegal aliens.

The controversy over immigration first started when migration reached a peak in the early 1900's when between the years of 1900 and 1910 over 1 million immigrants entered the United States each year. (Hsu, 2009) Ever since then, immigration has constantly been in debate. Immigration is the powerful strength behind U. S. population increase, right now accounting for half of total net population boost.

Our countries population growth, which at three million per year right now is the maximum in the developed world, is a main cause of many of the United States problems and presents a severe risk to our limited natural resources such as topsoil, forests, clean air and water, and healthy ecosystems. Statistics are saying that the population of the United States in the year 2050 should be around 500 million. The population is not just growing, but it is rapidly increasing. Some states are becoming so overpopulated with this rapid growth that people are comparing them to be growing more immensely than that of some third world countries. This extremely rapid growth is beginning to put a vast strain on our countries natural resources, cities and environmental health. There is beginning to be many conflicts connected with massive population growth, such as heavy traffic, air pollution, water and energy shortages, extremely overcrowded schools, declines in purchasing authority and quality of living, tax increases, and soil erosion. "However, the average American citizen's birthrate is at substitution level.

What most of the American population doesn't realize is that "over 70% of the United States expansion is due to mass- immigration of people generated into the population growth. "(immigration) A supreme restraint on legal immigration would considerably decrease on both existing and future chain migration. This restriction would give the United States time to even out the current population, address the problems created by over-stressed city infrastructures and poverty, and to form an environmental policy to protect strained natural resources.

A halt would then give time for new immigrants and poor citizens alike to achieve better opportunities through higher salary and improved learning opportunities. "The United states currently takes in over one million legal immigrants each year, which is more than all other developed nations in the world, combined. " The absolute number of immigrants has bas

Making Immigrants in Modern Argentina Julia Albarracín, 2020-05-31 In Making Immigrants in Modern

Argentina Julia Albarrac n argues that modern Argentina s selection of immigrants lies at the intersection of state decision making processes and various economic cultural and international factors Immediately after independence Argentina designed a national project for the selection of Western European immigrants in order to build an economically viable society but also welcomed many local Latin Americans as well as Jewish and Middle Eastern immigrants Today Argentines are quick to blame Latin American immigrants for crime drug violence and an increase in the number of people living in shantytowns Albarrac n discusses how the current Macri administration possibly emulating the Trump administration s immigration policies has rolled back some of the rights awarded to immigrants by law in 2003 through an executive order issued in 2017 Albarrac n explains the roles of the executive and legislative branches in enacting new policies and determines the weight of numerous factors throughout this process Additionally Albarrac n puts Argentine immigration policies into a comparative perspective and creates space for new ways to examine countries other than those typically discussed Incorporating a vast amount of research spanning 150 years of immigration policies five decades of media coverage of immigration surveys with congresspersons and interviews with key policy makers Albarrac n goes beyond the causes and consequences of immigration to assess the factors shaping policy decisions both in the past and in modern Argentina This book will appeal to scholars students and general readers with an interest in immigration democratization race history culture nationalism Latin American studies and representation of minorities in the media
