Endless Immunity Marc Daëron, 2025-08-19 This book takes the reader on an inspiring journey into the immune system challenging long held beliefs about immunity It examines the immune system under historical philosophical and biological perspectives It proposes a new way of understanding immunity that goes beyond the binary opposition between self and non self Indeed we the livings are chimeras Mammals birds reptiles or fish insects spiders or mollusks plants or algae we are all made up of a community of living beings who share their lives in the same meta organism If we live together it is because we need each other to live and if we can live together it is because an immune system makes it possible by adapting us to them and by adapting them to us From this mutual adaptation a new kind of immunity emerges dynamic relational never acquired an endless immunity Immunity that this system makes possible is not perfect far from it it is a compromise which does not always prevent disease sometimes it even causes it Disease is the cost of immunity Because what the immune system enables is much more essential than the defense of the organism it is the very existence of the meta organism that we are Immunity is more than a protection it is a condition of existence With its didactic structure and accessible style this book is an essential resource for anyone interested

in understanding the nature and function of the immune system It also offers different levels of complexity from which the reader can choose depending on his or her background without compromising the main message of the text With a Foreword from Alfred I Tauber **Life Skills Curriculum: ARISE Big Kids Book of Life's Lessons: Grade 4 -5 , Volume 1** ARISE
