**Calling the Shots** Jennifer A Reich, 2016-06-21 An award winning book brings meticulousness and sensitivity to this emotional issue and may prove the most convincing to anti vaxxers New York Review of Books The measles outbreak at Disneyland in December 2014 spread to a half dozen U S states and sickened 147 people It is just one recent incident that

the medical community blames on the nation's falling vaccination rates. Still many parents continue to claim that the risks that vaccines pose to their children are far greater than their benefits. Given the research and the unanimity of opinion within the medical community, many ask how such parents, who are most likely to be white, college educated and with a family income over 75,000, could hold such beliefs. For over a decade, Jennifer Reich has been studying the phenomenon of vaccine refusal from the perspectives of parents who distrust vaccines and the corporations that make them as well as the health care providers and policy makers who see them as essential to ensuring community health. Reich reveals how parents who opt out of vaccinations see their decision and what they believe is in their child's best interest. Based on interviews with parents who fully reject vaccines as well as those who believe in slow-vax or altering the number of and time between vaccinations, the author provides a fascinating account of these parents' points of view. *Calling the Shots* offers a unique opportunity to understand the points of disagreement on what is best for children, communities and public health and the ways in which we can bridge these differences. An essential contribution to the story of vaccines in contemporary U.S. society.

*American Journal of Sociology*     *The Vaccine Handbook: A Practical Guide for Clinicians, Twelfth Edition* Gary S. Marshall, MD, 2023.
