Impact Factor Journals 2012 List:

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrop rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences [Handbook of Bibliometric Indicators](#) Roberto Todeschini, Alberto Baccini, 2016-05-04 At last the first systematic guide to the growing jungle of citation indices and other bibliometric indicators Written with the aim of providing a complete and unbiased overview of all available statistical measures for scientific productivity the core of this reference is an alphabetical dictionary of indices and other algorithms used to evaluate the importance and impact of researchers and their institutions In 150 major articles the authors describe all indices in strictly mathematical terms without passing judgement on their relative merit From widely used measures such as the journal impact factor or the h index to highly specialized indices all indicators currently in use in the sciences and humanities are described and their application explained The introductory section and the appendix contain a wealth of valuable supporting information on data sources tools and techniques for bibliometric and scientometric analysis for individual researchers as well as their funders and publishers **Handbook of Research on Administration, Policy, and Leadership in Higher Education** Mukerji, Siran, Tripathi, Purnendu, 2016-09-27 The creation of a sustainable and accessible higher education systems is a pivotal goal in modern society Adopting strategic frameworks and innovative techniques allows institutions to achieve this objective The Handbook of Research on Administration Policy and Leadership in Higher Education is an authoritative reference source for the latest scholarly research on contemporary management issues in educational institutions and presents best practices to improve policies and retain effective governance Addressing the current state of higher education at an international level this book is ideally designed for academicians educational

administrators researchers and professionals **How to Get Published in the Best Entrepreneurship Journals** Alain Fayolle, Mike Wright, 2014-01-31 Competition to publish in the top journals is fierce This book provides entrepreneurship researchers with relevant material and insights to support them in their efforts to publish their research in the most prestigious entrepreneurship outlets a Philosophy of Science and Meta-Knowledge in International Business and Management Timothy M. Devinney, Torben Pedersen, Laszlo Tihanyi, 2013-06-25 This volume explores major issues and concepts in the field of international business and management and asks the question What is it that we know It examines key topics such as multinational enterprise and strategic management theory post merger integration internalizing firms and the strategy performance relationship **Seeking Impact and Visibility** Trotter, Henry, Kell, Catherine, 2014-06-12 African scholarly research is relatively invisible globally because even though research production on the continent is growing in absolute terms it is falling in comparative terms In addition traditional metrics of visibility such as the Impact Factor fail to make legible all African scholarly production Many African universities also do not take a strategic approach to scholarly communication to broaden the reach of their scholars work To address this challenge the Scholarly Communication in Africa Programme SCAP was established to help raise the visibility of African scholarship by mapping current research and communication practices in Southern African universities and by recommending and piloting technical and administrative innovations based on open access dissemination principles To do this SCAP conducted extensive research in four faculties at the Universities of Botswana Cape Town Mauritius and Namibia **Planning Your Research And How To Write It** Abdul Aziz Nather, 2015-10-21 This book is a practical guide for residents and young researchers who are planning to embark on research It details the significant planning one must first do including choosing a suitable experienced clinician as a supervisor sourcing for a winning idea with significant clinical impact performing a proper review of literature defining clearly the objectives to be set and adopting the appropriate methodology Statistical evaluation must be done from the start of the research to define adequate sample size and also for evaluation of the results It also advises how one should draw upon relevant and appropriate conclusions from the results obtained The ethics of research is also discussed An all important factor in research is the procurement of research grants Readers are guided how to write a proper research proposal to secure these much needed grants Many research papers end up as presentations only in local or international conferences An important additional objective of this book is to guide young researchers how to write their finished product as a publication in an important international refereed journal or as a thesis Chapters have been specially written with tips for scientific writing selecting the right journal writing for an original article for a journal a review article a case report as well as for a thesis Tips are also written on what reviewers of a journal look for in an article as well as what examiners look for in a thesis Web Metrics for Library and Information Professionals David Stuart, 2014-01-02 A practical guide to using web metrics to measure impact and demonstrate value The web provides an opportunity to collect a host of different metrics from

those associated with social media accounts and websites to more traditional research outputs This book is a clear guide for library and information professionals as to what web metrics are available and how to assess and use them to make informed decisions and demonstrate value As individuals and organizations increasingly use the web in addition to traditional publishing avenues and formats this book provides the tools to unlock web metrics and evaluate the impact of this content Key topics covered include Introduction to web metrics Bibliometrics webometrics and web metrics Data collection tools Evaluating impact on the web Evaluating social media impact Investigating relationships between actors Exploring traditional publications in a new environment Web metrics and the web of data The future of web metrics and the library and information professional Readership This book will provide a practical introduction to web metrics for a wide range of library and information professionals from the bibliometrician wanting to demonstrate the wider impact of a researcher's work than can be demonstrated through traditional citations databases to the reference librarian wanting to measure how successfully they are engaging with their users on Twitter It will be a valuable tool for anyone who wants to not only understand the impact of content but demonstrate this impact to others within the organization and beyond **Health Sciences**

Librarianship M. Sandra Wood, 2014-05-09 This comprehensive textbook of health sciences librarianship provides the library student and new librarian with the background and skills necessary to handle day to day activities and provide quality services in a health sciences library or a more general library serving students and practitioners in the health professions The book has 16 chapters each authored by an experienced medical librarian and is organized logically into 4 sections The Profession Collection Services User Services and Administrative Services Each chapter contains photographs figures tables and charts illustrating the essential concepts introduced Overseen by a 3 member editorial board of leading professors in medical librarianship programs this authoritative text provides students beginning and experienced librarians with a comprehensive overview of state of the art medical librarianship **Writing for Publication** Georgina Tuari Stewart, Nesta Devine, Leon Benade, 2021-02-06 This book focuses on academic writing and how academics who are experts in their fields can translate their expertise into publishable form The magnitude and speed of the changes that are transforming the global academic landscape produce an ongoing need for literature that interprets the nature of academic work This book arises from the background discipline of Education which is a relatively new university subject that draws on the entire knowledge spectrum from the fine arts to the natural sciences Each chapter addresses an aspect of the conditions of written academic labour in an age of digital publishing its nature how it works and guidance for successful navigation This book will provide helpful guidance to graduate students researchers and teachers in universities and higher education who are united by the challenges of this new world of academic publishing **What Every Medical Writer Needs to Know** Robert B.

Taylor, 2015-08-29 This book presents must know facts generally not covered in How To books about medical writing Every medical writer whether a beginner or veteran needs answers to questions many might not even know to ask How does your

personality type influence your writing behavior and what can you do to make writing easier for you What should you ask before agreeing to co author an article for publication or write a book chapter What are some of the current issues regarding copyright and plagiarism that authors may face What has research discovered about the quotations and references found in journal articles What do you need to know about open access journals and predatory publishers Dr Taylor tells some surprising truths about medical publishing including possible sources of peer review bias and some alarming influences on what ends up in print He also relates little known stories about renowned medical writers such as Sir William Osler William Carlos Williams and Elisabeth K bler Ross and the origins of some of medicine s classic publications What Every Medical Writer Needs to Know provides information vital for every health care professional who aspires to write for others to read academicians and practicing physicians nurses nurse practitioners and physician assistants and professional medical and scientific writers

The Research Experience Ann Sloan Devlin, 2020-07-30 The Research Experience Planning Conducting and Reporting Research Second Edition is the complete guide to the behavioral science research process The book covers theoretical research foundations guiding students through each step of a research project with practical instruction and help The latest technological tools such as SurveyMonkey Qualtrics and Amazon Mechanical Turk are included to show the increasing influence of the Internet to conduct studies and how research is conducted in the world today Taking students through the process from generating ideas for research to writing and presenting findings helps them absorb and apply the material With its practical emphasis and supporting pedagogy students will be able to successfully design and execute a research project Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

The SSCI Syndrome in Higher Education Chuin Prudence Chou, 2014-02-07 As a result of the world class university rankings many governments adopt public incentives and sanctions to push universities to excel Above all the better faculty research publication in SSCI and SCI journals the more resources and social prestige universities will obtain This timely book attempts to relate these dilemmas in Taiwan to many non English speaking counterparts which also struggle with the worldwide SSCI syndrome As Taiwan s higher education system similar to that of some other countries has been recently devastated by the SSCI based quantitative evaluations of academic performance in terms of its adverse impacts on the balances between teaching vs research qualitative vs quantitative evaluations globally oriented English vs locally oriented non English publications and publications in academic journals vs books The SSCI Syndrome in Higher Education is a long overdue study that offers a systematic comprehensive coverage of the above mentioned SSCI syndrome on the dynamics of Taiwan s academe This book definitely helps fill an important gap in the literature on Taiwan s higher education system Tsung Chi Professor of Politics Occidental College USA Prudence Chou s book addresses an academy on crisis caused by the ceaseless hype over university rankings It further confirms that who comes out on top depends on who is doing the

ranking To save the heart and soul out of the Taiwanese academy this book makes a cogent argument for culturally responsive research in the social sciences and humanities Gerard A Postiglione Professor and Head Division of Policy Administration and Social Sciences Director Wah Ching Center of Research on Education in China The University of Hong Kong A spectre is haunting almost all universities in the world including Taiwan the spectre of indexization Academics particularly social scientists are panting from the pressure of globally spread neoliberal ideology and market based principles Collegiality on campus in the good old days has declined and managerialism gained power instead Competitive funding and university rankings are excessively emphasized and research results are required to be internationalized i e published in English Although this book is a case study of so called SSCI syndrome in Taiwan the problems and challenges as well as prescription contained here are common to all academics especially those in the non English speaking countries positioned as peripheral Yutaka Otsuka Professor of Hiroshima University President of Japan Comparative Education Society The danger with SSCI syndrome is that it encourages social studies in nonwestern societies to dissociate themselves from local contexts reflecting a particular view of what is claimed to be universal that is informed only by the Western especially English speaking world It raises the question of what counts as scholarship and defines what knowledge is and who may claim competence in it This volume serves us well as a timely reminder of such a great danger Rui Yang Professor Faculty of Education University of Hong Kong

Encyclopedia of Forensic and Legal Medicine, 2015-09-29 Encyclopedia of Forensic and Legal Medicine Volumes 1 4 Second Edition is a pioneering four volume encyclopedia compiled by an international team of forensic specialists who explore the relationship between law medicine and science in the study of forensics This important work includes over three hundred state of the art chapters with articles covering crime solving techniques such as autopsies ballistics fingerprinting hair and fiber analysis and the sophisticated procedures associated with terrorism investigations forensic chemistry DNA and immunoassays Available online and in four printed volumes the encyclopedia is an essential reference for any practitioner in a forensic medical healthcare legal judicial or investigative field looking for easily accessible and authoritative overviews on a wide range of topics Chapters have been arranged in alphabetical order and are written in a clear and concise manner with definitions provided in the case of obscure terms and information supplemented with pictures tables and diagrams Each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading Brings together all appropriate aspects of forensic medicine and legal medicine Contains color figures sample forms and other materials that the reader can adapt for their own practice Also available in an on line version which provides numerous additional reference and research tools additional multimedia and powerful search functions Each topic includes cross referencing to related articles and case studies where further explanation is required along with references to external sources for further reading

Handbook of Ratings
Alexander Karminsky, Andrey Polozov, 2016-08-04 This handbook presents a systematic overview of approaches to diversity

and problems involved in interdisciplinary rating methodologies Historically the purpose of ratings is to achieve information transparency regarding a given body's activities whether in the field of finance banking or sports for example This book focuses on commonly used rating methods in three important fields finance sports and the social sector In the world of finance investment decisions are largely shaped by how positively or negatively economies or financial instruments are rated Ratings have thus become a basis of trust for investors Similarly sports evaluation and funding are largely based on core ratings From local communities to groups of nations public investment and funding are also dependent on how these bodies are continuously rated against expected performance targets As such ratings need to reflect the consensus of all stakeholders on selected aspects of the work and how to evaluate their success The public should also have the opportunity to participate in this process The authors examine current rating approaches from a variety of proposals that are closest to the public consensus analyzing the rating models and summarizing the methods of their construction This handbook offers a valuable reference guide for managers analysts economists business informatics specialists and researchers alike

Communicate Science Papers, Presentations, and Posters Effectively Gregory S. Patience, Daria C. Boffito, Paul Patience, 2015-09-03 *Communicate Science Papers Presentations and Posters Effectively* is a guidebook on science writing and communication that professors students and professionals in the STEM fields can use in a practical way This book advocates a clear and concise writing and presenting style enabling users to concentrate on content The text is useful to both native and non native English speakers The book includes chapters on the publishing industry discussing bibliometrics indexes and citations plagiarism and how to report data properly It also offers practical guidance for writing equations and provides the reader with extensive practice material consisting of both exercises and solutions Covers how to accurately and clearly exhibit results ideas and conclusions Identifies phrases common in scientific literature that should never be used Discusses the theory of presentation including before and after examples highlighting best practices Provides concrete step by step examples on how to make camera ready graphs and tables
