Science, Technology and Taxation **Robert F. van Brederode**, 2012-08-01

This first comprehensive study of the interaction between technology and taxation approaches the subject along four main avenues insight and analysis gained from empirical legal studies conducted in the area of taxation methods for improving the control and management of the tax function in business tax auditing through statistical sampling and changes in the fiscal environment as a result of technological capabilities

Among the topics that arise are the following what choices of sampling methodology exist determination of both one sided and two sided confidence intervals under what circumstances statistical sampling is acceptable as proof of underpayment and as a basis for penalties the use of sampling agreements as a tool to improve taxpayers understanding of the process complexities encountered by the introduction of technology in tax administration in developing countries technological capability to detect economic activity in the informal sector technological innovation as substitute for inadequate human capacity improvements available to better monitor the movement and values of goods entering a country safeguards to prevent unauthorized use of personal information prioritizing resources to ensure that the key strategic objectives of the agency are being addressed government defensive action and the threat to privacy and capabilities and limitations of enterprise resource planning systems and tax engines

Although the author pays especially detailed attention to the technologies developed and used by the United States Internal Revenue Service other notable systems developed by the European Union Brazil Mexico and China are also examined

Various sampling methods and practices are illustrated with numerical examples As tax systems acquire ever higher levels of integration and because accuracy is crucial to the measurement of tax compliance the perspectives opened and expertly

analyzed by the author will prove of great importance Practitioners tax policymakers and administrators tax standard setters and tribunals dealing with disputes over tax administration and procedure as well as academics and researchers will instantly recognize the book s great importance and practical value
