Plant-Fungal Pathogen Interaction Hermann H.

Prell, Peter Day, 2013-03-09 Research on the interactions of plants and phytopathogenic fungi has become one of the most interesting and rapidly moving fields in the plant sciences the findings of which have contributed tremendously to the development of new strategies of plant protection This book offers insight into the state of present knowledge Special emphasis is placed on recognition phenomena between plants and fungi parasitization strategies employed by the phytopathogenic fungi the action of phytotoxins the compatibility of pathogens with host plants and the basic resistance of non host plants as well as cultivar specific resistance of host plants Special attention is paid to the gene for gene hypothesis for the determination of race specific resistance its molecular models and to the nature of race non specific resistance as well as the population dynamics of plants and the evolution of their basic resistance **Basic Biology and Clinical Aspects of Inflammation** Robert F. Diegelmann, Charles E. Chalfant, 2016-03-07 Basic Biology and Clinical Aspects of Inflammation provides information about the critical cells and biochemical mediators involved in the complex process of inflammation Readers are introduced to the basic scientific background on the subject after which the book progresses towards translational research in clinical settings Topics covered in this volume include the modulation of inflammation during normal and chronic wound healing altered metabolism during inflammation processes the effect of ageing on inflammatory processes as well as details about the underlying molecular processes behind specific clinical pathologies that are driven by excessive inflammation in the body allergic reactions type 2 diabetes cardiac and vascular disease arthritis periodontal disease inflammatory bowel disease and neuroinflammation The volume also provides the latest information on pharmacotherapy for inflammation and interesting contributions towards the mathematical modeling and network analysis of inflammation Basic Biology and Clinical Aspects of Inflammation features contributions from by a distinguished group of international researchers and clinicians highly recognized for their specific expertise in the field of inflammation The information presented in this reference is useful to academics medical professionals health care regulators and pharmaceutical scientists **The Geographic Spread of Infectious Diseases** Lisa Sattenspiel, Alun Lloyd, 2009-07-26 The 1918 19 influenza epidemic killed more than fifty million people worldwide The SARS epidemic of 2002 3 by comparison killed fewer than a thousand The success in containing the spread of SARS was due largely to the rapid global response of public health authorities which was aided by insights resulting from mathematical models Models enabled authorities to better understand how the disease spread and to assess the relative effectiveness of different control strategies In this book Lisa Sattenspiel and Alun Lloyd provide a comprehensive introduction to mathematical models in epidemiology and show how they can be used to predict and control the geographic spread of major infectious diseases Key concepts in infectious disease modeling are explained readers are guided from simple mathematical models to more complex ones and the strengths and weaknesses of these models are explored The book highlights the breadth of techniques available to modelers today such as population based and individual based models and covers specific applications as well Sattenspiel and Lloyd examine the

powerful mathematical models that health authorities have developed to understand the spatial distribution and geographic spread of influenza measles foot and mouth disease and SARS Analytic methods geographers use to study human infectious diseases and the dynamics of epidemics are also discussed A must read for students researchers and practitioners no other book provides such an accessible introduction to this exciting and fast evolving field
