Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on

international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations. Driven by the aim to achieve consistency in the international tax treaty practice, the structure and content is to a large extent similar in the UN Model and the OECD Model. However, whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries, the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention. Compared to the OECD Model Convention, the UN Model Convention aims at giving more weight to the source principle. Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided. Interestingly, in the discussions of the tax challenges arising from the digitalization of the economy, the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and/or user, i.e. the market jurisdictions. As this has traditionally been the focus of the UN Model Convention, its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement. This book contains the master's theses of the full-time LL.M. program 2018/2019 for which Special Features of the UN Model Convention has been chosen as the general topic. With this book, the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail. This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD's BEPS project on the UN Model.

Transfer Pricing in SMEs Veronika Solilova, Danuse Nerudova, 2017-10-31. This book provides a detailed assessment of current approaches to transfer pricing in the context of small and middle-sized enterprises (SMEs) including the newest update of Transfer Pricing Guidelines from 10 July 2017. It analyzes the transfer pricing rules for SMEs across the European Union (EU) and explores two alternative approaches as suitable solutions for current transfer pricing issues. The authors evaluate and discuss alternative approaches like Safe Harbour and Common Consolidated Corporate Tax Base (CCCTB). Taking into account the prominent role of SMEs in the European Union's economy, the book also puts forward policy recommendations to achieve the long-term goals of the EU's 2020 agenda.

Mergers, Acquisitions, and Other Restructuring Activities Donald DePamphilis,2015-07-28 Mergers Acquisitions and Other Restructuring Activities is unique in that it is the most current comprehensive and cutting edge text on M A and corporate restructuring available It is current in that it includes many of the most up to date and notable deals e g Facebook s takeover of WhatsApp the Dell privatization and Verizon s mega buyout of Vodafone s share of Verizon Wireless precedent setting judicial decisions e g efforts to overturn defenses at Airgas and Sotheby s new regulations e g expediting backend mergers trends e g increasing role of activist investors in takeovers and new tactics e g two tiered poison pill employed in M As Most

integrative case studies are new for this edition and involve transactions that have been announced or completed since 2013. It is comprehensive in that nearly all aspects of MAs and corporate restructuring are explored. It is cutting edge in that conclusions and insights are anchored by the most recent academic research with references to more than 200 empirical studies published in leading peer reviewed journals just since 2012. And the substantially updated content is illustrated with numerous practical exhibits, case studies involving diverse transactions, easy to understand numerical examples, and hundreds of discussion questions and practice exercises. The highlights of the new edition are listed here. New Chapters: Two new chapters, Chapter 9 and 14. Chapter 9 discusses the basics of applying financial modeling methods to firm valuation and assists the reader in understanding the power and limitations of models in analyzing real world situation. Chapter 14 illustrates how complex financial models often are used to support the deal structuring process during MA negotiations. New Cases: Ninety percent of the nearly forty case studies are new and involve transactions announced or completed during the last three years. These cases represent friendly, hostile, highly leveraged and cross border deals in ten different industries involving public and private firms as well as firms experiencing financial distress. All end of chapter case studies begin with a Key Objectives section indicating what the student should learn from the case study and include discussion questions and solutions available in the online instructors manual. Latest Research: This edition focuses on the most recent and relevant academic studies, some of which contain surprising insights changing the way we view this subject matter. Recent research has significant implications for academicians, students, MA practitioners and government policy makers, shedding new light on current developments and trends in the ever changing mergers and acquisitions market. The market for corporate control and corporate restructuring strategies are constantly changing, reflecting the ongoing globalization of both product and capital markets, accelerating technological change, escalating industry consolidation, changing regulatory practices and intensifying cross border competition. While continuing to be relevant, empirical research covering the dynamics of the MA markets of the 1970s, 1980s and 1990s may be less germane in explaining current undercurrents and future trends.

Financial Management: Principles and Applications J. William Petty, Sheridan Titman, Arthur J. Keown, Peter Martin, John D. Martin, Michael Burrow, 2015-05-20. The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems in short to educate students in finance. Mergent Industrial Manual, 2001.
