The Practice of Enterprise Modeling Jaap Gordijn, Wided Guédria, Henderik A. Proper, 2019-11-19 This volume

constitutes the proceedings of the 12th IFIP WG 8.1 Conference on the Practice of Enterprise Modeling held in November 2019 in Luxembourg. The conference was created by the International Federation for Information Processing (IFIP) Working Group 8.1 to offer a forum for knowledge transfer and experience sharing between the academic and practitioner communities. The 15 full papers accepted were carefully reviewed and selected from 35 submissions. They are grouped by the following topics: modeling and ontologies, reference architectures and patterns, methods for architectures and models, and enterprise architecture for security, privacy, and compliance. **MASTERING ARCHIMATE EDITION 3.2** GERBEN. WIERDA, 2024. **Advances in Enterprise Engineering XVII** Monika Malinova, Mandelburger, Sérgio Guerreiro, Cristine Griffo, David Aveiro, Henderik A. Proper, Marianne Schnellmann, 2024-05-02. This book constitutes the refereed proceedings of the 13th Enterprise Design and Engineering Working Conference on Advances in Enterprise Engineering XVII EDEWC 2023 held in Vienna, Austria, during November 27-28, 2023. Enterprise design and engineering aims to take an integrative and engineering-oriented perspective to enterprise development management. As such, it considers enterprises as purposefully designed systems where all relevant aspects should be designed in coherence. The new scope of EDEWC reflects the rapid increase in digitization of enterprises in the last decade. This has resulted in a substantial change in the nature and structure of enterprises, which was the main focus of EDEWC 2023. The 5 full papers and 2 short papers included in this book were carefully reviewed and selected from 15 submissions. **The Practice of Enterprise Modeling** Balbir S. Barn, Kurt Sandkuhl, 2022-11-16. This book constitutes the proceedings of the 15th IFIP Working Conference on the Practice of Enterprise Modeling PoEM 2022, which took place in London, UK, during November 23-25, 2022. PoEM offers a forum for sharing experiences and knowledge between the academic community and practitioners from industry and the public sector. This year, the theme of the conference is Enterprise Modeling and Model-based Development and Engineering. The 15 full papers presented in this volume were carefully reviewed and selected from a total of 45 submissions. They were organized in topical sections as follows: models in information system development, modeling enterprise architectures, modeling capabilities and ecosystems, DSML and meta-modeling, and participatory modeling. **Mastering Enterprise Solution Modeling** Sean (Chunhong) Gu, 2024-12-19. Embark on a journey through the Agile Enterprise Solution Architecture. A ESA framework with this in-depth guide designed to provide a structured approach to IT solution modeling. The modeling approach is based on the principles of simplicity, significance, and systematics. It effectively addresses architectural debt issues in today's agile and large-scale IT solutions. Beginning with a foundational overview of A ESA model specifications, the book introduces readers to the intent and unique methodologies behind A ESA. It then delves into practical demonstrations through example solution cases, offering real-world context and insights into various architectural styles. Each chapter builds on this knowledge, covering the governing ideas of the thinking framework and essential topics such as key metrics and modeling considerations for diverse architectural styles, ensuring a thorough understanding of A ESA.

application in different contexts The book also emphasizes the link between enterprise architecture EA and solution architecture SA and the importance of governance and measurement in maintaining the integrity and effectiveness of architectural solutions Readers will explore critical metrics governance techniques and the impact of agile modeling on purpose and architectural leading practices With practical examples measurement techniques and governance strategies this guide equips readers with the cognitive and practical tools necessary for strategic and effective architectural thinking Concluding with reflections and future outlooks this comprehensive guide offers valuable insights for mastering IT solution modeling within the A ESA framework You Will Gain hands on experience with the Agile Enterprise Solution Architecture A ESA framework through detailed examples and solution cases that illustrate various architectural styles and modeling techniques Understand the critical metrics and model mappings necessary for evaluating architectural quality and performance Develop a deep understanding of the A ESA architectural thinking including strategic enterprise business data and cloud architecture considerations This book is for IT architects enterprise architects and solutions architects

Masterclass Enterprise Architecture Management Jürgen Jung,Bardo Fraunholz,2021-09-06 This textbook provides a hands on introduction to enterprise architecture management It guides the reader through the applications of methods and tools to typical business problems by presenting enterprise architecture frameworks and by sharing experiences from industry The structure of the book represents the typical stages of the journey of an enterprise architect Chapter 1 addresses the central question of what to achieve with the introduction of an enterprise architecture Chapter 2 then introduces concepts and visualizations for business architecture that help with understanding the business In chapter 3 the development of an application architecture is outlined which provides transparency on information systems and their business context Next chapter 4 presents visual tools to analyze improve and eventually optimize the application landscape Chapter 5 discusses both traditional organizational as well as collaborative approaches to enterprise architecture management Eventually several established enterprise architecture frameworks like TOGAF Zachmann ArchiMate and IAF are described in chapter 6 The book concludes with a summary and an outlook on future research potential in chapter 7 Based on their experiences through several years of teaching the authors introduce students step by step to enterprise architecture development and management Their book is intended as a guide for master classes at universities and includes lots of exercises and references for further reading Enterprise Design, Operations, and Computing. Data Management: a gentle introduction Bas van Gils, 2020-03-03 The overall objective of this book is to show that data management is an exciting and valuable capability that is worth time and effort More specifically it aims to achieve the following goals 1 To give a gentle introduction to the field of DM by explaining and illustrating its core concepts based on a mix of theory practical frameworks such as TOGAF ArchiMate and DMBOK as well as results from real world assignments 2 To offer guidance on how to build an effective DM capability in an organization This is illustrated by various use cases linked to the previously mentioned theoretical exploration as well as the stories of practitioners in the field The primary target groups are busy professionals who are actively involved with managing data The book is also aimed at Bachelor's Master's students with an interest in data management The book is industry agnostic and should be applicable in different industries such as government finance telecommunications etc Typical roles for which this book is intended data governance office council data owners data stewards people involved with data governance data governance board enterprise architects data architects process managers business analysts and IT analysts The book is divided into three main parts theory practice and closing remarks Furthermore the chapters are as short and to the point as possible and also make a clear distinction between the main text and the examples If the reader is already familiar with the topic of a chapter he/she can easily skip it and move on to the next

Architectural Design Chris A. Vissers, Luís Ferreira Pires, Dick A.C. Quartel, Marten van Sinderen, 2016-09-30 This book presents a design methodology that is practically applicable to the architectural design of a broad range of systems It is based on fundamental design concepts to

conceive and specify the required functional properties of a system while abstracting from the specific implementation functions and technologies that can be chosen to build the system Abstraction and precision are indispensable when it comes to understanding complex systems and precisely creating and representing them at a high functional level Once understood these concepts appear natural self evident and extremely powerful since they can directly precisely and concisely reflect what is considered essential for the functional behavior of a system The first two chapters present the global views on how to design systems and how to interpret terms and meta concepts This informal introduction provides the general context for the remainder of the book On a more formal level Chapters 3 through 6 present the main basic design concepts illustrating them with examples Language notations are introduced along with the basic design concepts Lastly Chapters 7 to 12 discuss the more intricate basic design concepts of interactive systems by focusing on their common functional goal These chapters are recommended to readers who have a particular interest in the design of protocols and interfaces for various systems The didactic approach makes it suitable for graduate students who want to develop insights into and skills in developing complex systems as well as practitioners in industry and large organizations who are responsible for the design and development of large and complex systems It includes numerous tangible examples from various fields and several appealing exercises with their solutions

Enterprise, Business-Process and Information Systems Modeling Han van der Aa, Dominik Bork, Henderik A. Proper, Rainer Schmidt, 2023-05-30 This book contains the refereed proceedings of two long running events held along with the CAiSE conference relating to the areas of enterprise business process and information systems modeling the 24th International Conference on Business Process Modeling Development and Support BPMDS 2023 and the 28th International Conference on Exploring Modeling Methods for Systems Analysis and Development EMMSAD 2023 The conferences were taking place in Zaragoza Spain during June 12 13 2023 For BPMDS 9 full papers and 2 short papers were carefully reviewed and selected for publication from a total of 26 submissions for EMMSAD 9 full papers and 3 short papers were accepted from 26 submissions after thorough reviews The BPMDS papers deal with a broad range of theoretical and applications based research in business process modeling development and support EMMSAD focusses on modeling methods for systems analysis and development

Mastering ArchiMate G.C.Th. Wierda, 2012 *Emerging Trends in the Evolution of Service-Oriented and Enterprise Architectures* Eman El-Sheikh, Alfred Zimmermann, Lakhmi C. Jain, 2016-09-23 This book presents emerging trends in the evolution of service oriented and enterprise architectures New architectures and methods of both business and IT are integrating services to support mobility systems Internet of Things Ubiquitous Computing collaborative and adaptive business processes Big Data and Cloud ecosystems They inspire current and future digital strategies and create new opportunities for the digital transformation of next digital products and services Services Oriented Architectures SOA and Enterprise Architectures EA have emerged as a useful framework for developing interoperable large scale systems typically implementing various standards like Web Services REST and Microservices Managing the adaptation

and evolution of such systems presents a great challenge Service Oriented Architecture enables flexibility through loose coupling both between the services themselves and between the IT organizations that manage them Enterprises evolve continuously by transforming and extending their services processes and information systems Enterprise Architectures provide a holistic blueprint to help define the structure and operation of an organization with the goal of determining how an organization can most effectively achieve its objectives The book proposes several approaches to address the challenges of the service oriented evolution of digital enterprise and software architectures
